# ARKANSAS HIGHER EDUCATION COORDINATING BOARD SPECIAL MEETING

University of Arkansas at Pine Bluff S.J. Parker 1890 Extension Complex Auditorium Thursday, January 26, 2012 4:00 p.m.

### **AGENDA**

- 1. Fall 2011 Annual Enrollment Report (Mr. Rick Jenkins)
- 2. Annual Report on First-Year Student Remediation for Fall 2011(Mr. Jenkins)
- 3. Annual Higher Education Financial Condition Report (Ms. Jackie Holloway)
- 4. Report of the Nominating Committee (Dr. Bob Burns)

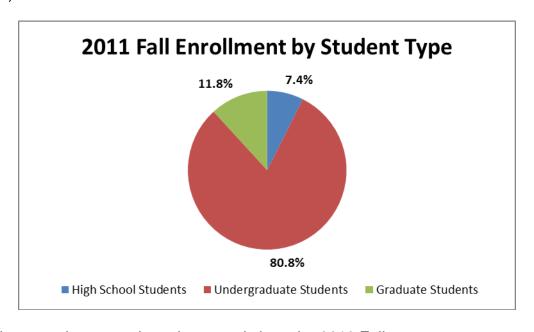

### **ANNUAL ENROLLMENT REPORT**

<u>Attachments</u>	
Attachment 1-1	Fall Enrollment: From 2007 Fall through 2011 Fall
Attachment 1-2	Annual Unduplicated Enrollment by Academic Year and Institution
Attachment 1-3	Enrollment by Gender
Attachment 1-4	Enrollment by Race/Ethnicity
Attachment 1-5	Enrollment by Age
Attachment 1-6	Enrollment by Attend Status
Attachment 1-7	Fall Only SSCH and FTE
Attachment 1-8	Annual SSCH and FTE

### **One-year comparisons:**

The **total** enrollment for the 2011 Fall term in all sectors of Arkansas higher education (public universities, public colleges, as well as independent colleges and universities) was **175,997 students**; representing a 1-year increase of 2.1 percent.

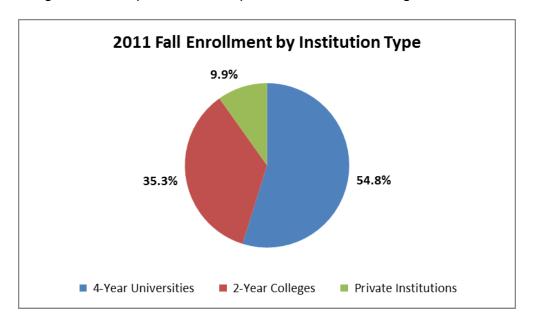

Of these 175,997 students, 13,043 were high school students (7.4 percent), 142,171 were undergraduate students (80.8 percent) and 20,763 were graduate students (11.8 percent).

All of these student types have increased since the 2010 Fall term:

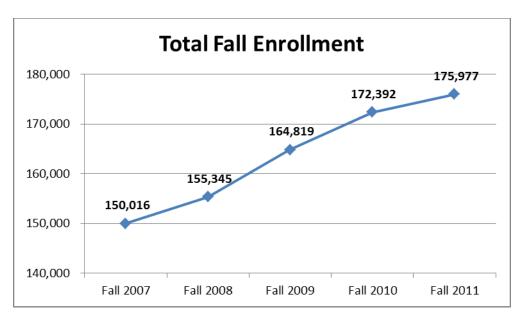

Growth Since 2010 Fall	<u>Numbers</u>	<u>Percent</u>
High School Students	1,650	14.5%
Undergraduate Students	1,271	0.9%
Graduate Students	664	3.3%
Total	3.585	2.1%

Public 4-Year University enrollment continues to constitute the majority of all higher education enrollment in Arkansas. The below pie chart illustrates that 54.8 percent of all college students are enrolled at public 4-Year Universities, 35.3 percent are at public 2-Year Colleges, and 9.9 percent are at private institutions of higher education.

### Five-year comparisons:

Comparing current data to data for Fall 2007, total enrollment is up by 25,961 students (17.3 percent).

Total Fall Enrollment for Five Years, All Sectors 120,000 96,468 93,933 89.893 86,127 84,293 90,000 61,959 62,158 59,419 54,266 51,228 60,000 30,000 16,500 17,351 14,952 15,507 14,495 Fall 2007 Fall 2008 Fall 2009 Fall 2010 Fall 2011

→ 2-Year Colleges

Private Institutions

Public institutions account for over 90 percent of total enrollment.

The following summarizes more specific changes by sector:

4-Year Universities

#### Public Universities:

### One-year comparisons:

- Total enrollments at public universities increased by 2,535 students from the previous year (2.7 percent).
- Six of the eleven public universities reported 1-year increases in total enrollment, led by the University of Arkansas Fayetteville (8.5 percent), the University of Arkansas at Monticello (7.8 percent), and Arkansas Tech University (6.6 percent),

### **Five-year comparisons:**

- Total enrollments at public universities increased by 12,751 students from the fall 2007 semester (14.4 percent).
- Nine of the eleven public universities reported 5-year increases in total enrollment, led by Arkansas Tech University (40.0 percent), Arkansas State University Jonesboro (24.9 percent), and the University of Arkansas Fayetteville (24.4 percent).

### Public Colleges:

### One-year comparisons:

- Total enrollments at public colleges increased by 199 students from the previous year (0.3 percent).
- Sixteen of the twenty-two public colleges reported 1-year increases in total enrollment, led by SAU Tech (15.4 percent), National Park Community College (8.1 percent), and Pulaski Technical College (6.5 percent).

### Five-year comparisons:

- Total enrollments at public colleges increased by 10,930 students from the fall 2007 semester (21.3 percent).
- Nineteen of the public colleges reported 5-year increases in total enrollment, led by Arkansas State University Newport (82.6 percent), National Park Community College (41.7 percent), and Pulaski Technical College (36.3 percent).

### Independent Institutions:

#### One-year comparisons:

- Total enrollment at independent institutions increased by 851 students from the previous year (5.2 percent).
- Eight of the eleven independent institutions reported 1-year increases in total enrollment, led by Central Baptist College (16.6 percent), John Brown University (15.2 percent), and Crowley's Ridge College (8.0 percent).

#### Five-year comparisons:

- Total enrollment at independent institutions increased by 2,856 students from the fall 2007 semester (19.7 percent).
- Nine of the eleven independent institutions reported 5-year increases in total enrollment, led by Arkansas Baptist College (100.5 percent), Central Baptist College (50.8 percent), and Philander Smith College (30.5 percent).

### **Annual Unduplicated Headcount Enrollment**

Annual unduplicated headcount enrollment is counting all students one time for the entire academic year. The student may be enrolled in two or more semesters but they are counted only once during the academic year. (Independent institutions are not included in this review as they have only recently begun providing enrollment data for each term.)

Attachment 1-2 shows the total number of students served in for-credit classes at Arkansas public higher education by academic year, focusing on the unduplicated headcount of students enrolled in colleges and universities during at least one term during the academic year. The semesters and terms composing an academic year correspond closely to the July 1 through June 30 fiscal year and chronologically include a second summer term, the following fall semester, the following spring semester, and the following first summer term. (Note: Students enrolled in off-schedule courses related to these semesters and terms are also included.) In those cases where the student enrolled in more than one term, which is most frequently the case, the student is counted only one time, hence this reports unduplicated headcount enrollment for the academic year and for each institution.

Unduplicated headcount provides a more complete picture of total statewide enrollment than does just the fall semester enrollment summary. The fall semester enrollment report presents a snapshot of enrollment that is valid for the fall term, but it does not take into account the number of new or returning students who enroll during the other

semesters and terms throughout the academic year. The unduplicated headcount enrollment summary is also a better measure of the total number of students served at the college or university level.

The annual unduplicated headcount enrollment for Academic Year 2011 (2010-2011) in Arkansas public higher education (4-year public universities and 2-year public colleges) was **202,963 students**; representing a 1-year increase of 2.4 percent.

The top three 4-year universities with the highest 1-year increase in annual unduplicated headcount enrollment were:

- 1. University of Arkansas Fayetteville 8.1 percent
- 2. Arkansas State University Jonesboro 8.0 percent
- 3. Arkansas Tech University 7.9 percent

Seven of the eleven 4-year universities experienced positive 1-year growth.

The top three 2-year colleges with the highest 1-year increase in annual unduplicated headcount enrollment were:

- 1. Ozarka College 14.1 percent
- 2. Black River Technical College 9.2 percent
- 3. SAU Tech 5.6 percent

Ten of the twenty-two 2-year colleges experienced positive 1-year growth.

The top three 4-year universities with the highest 5-year increase in annual unduplicated headcount enrollment were:

- 1. Arkansas Tech University 39.1 percent
- 2. Arkansas State University Jonesboro 32.7 percent
- 3. University of Arkansas Fayetteville 20.2 percent

Ten of the eleven 4-year universities experienced positive 5-year growth.

The top three 2-year colleges with the highest 5-year increase in annual unduplicated headcount enrollment were:

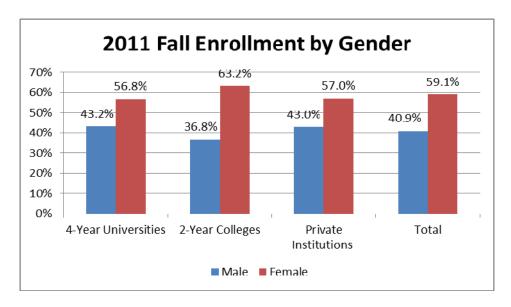

- 1. Arkansas State University at Newport 48.1 percent
- 2. Ozarka College 41.9 percent
- 3. Northwest Arkansas Community College 40.2 percent

Eighteen of the twenty-two 2-year colleges experienced positive 5-year growth.

# **Student Demographic Profile**

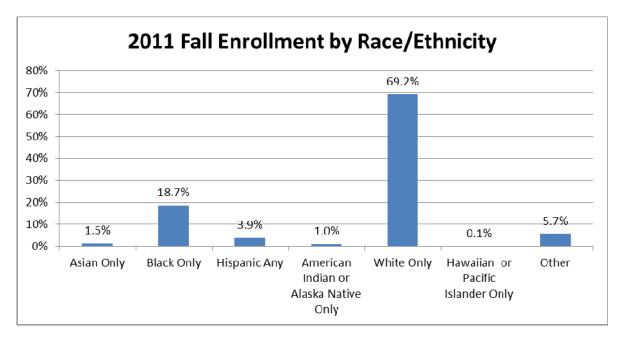

A demographic overview of students enrolled in Arkansas public higher education in fall 2011 contrasts significantly between the universities and the colleges and has changed since fall 2007.

• **Gender**: Overall, the proportion of male-to-female students has seen a gradual increase in the percentage of male students over the past 5 years from 40.2 percent in fall 2007 to 40.9 percent in fall 2011.

Institution Type	Percent Male 2007 Fall	Percent Male 2011 Fall	Change
4-Year Universities	42.5%	43.2%	0.7%
2-Year Colleges	35.5%	36.8%	1.4%
Private Institutions	43.8%	43.0%	-0.8%
Total	40.2%	40.9%	0.7%

 Race/Ethnicity: The race/ethnic breakdown for the fall 2011 semester by institution type is:

	Fall 2011			
Race Categories	4-Yr. Universities	2-Year Colleges	Private Institutions	Total
Asian Only	1.9%	0.9%	1.0%	1.5%
Black Only	15.8%	24.0%	15.5%	18.7%
Hispanic Any	3.7%	4.4%	2.9%	3.9%
American Indian or Alaska Native Only	1.1%	0.9%	0.7%	1.0%
White Only	69.8%	67.1%	73.0%	69.2%
Hawaiian or Pacific Islander Only	0.1%	0.2%	0.0%	0.1%
Two or More Races	2.0%	1.1%	1.3%	1.6%
Non-Resident Alien	3.9%	0.5%	4.1%	2.7%
Unknown	1.7%	0.9%	1.3%	1.4%
TOTAL	100.0%	100.0%	100.0%	100.0%

From the below table illustrating the change in Race/Ethnicity from 2010 Fall to 2011 Fall, it can be shown that the Black Only category has increased by 3.3 percentage points followed by the Hispanic Any category of 1.5 percentage points.

Char	Change from 2010 Fall to 2011 Fall													
Race Categories	4-Yr. Universities	2-Year Colleges	Private Institutions	Total										
Asian Only	0.0%	0.0%	-0.1%	0.0%										
Black Only	-0.5%	3.2%	0.6%	3.3%										
Hispanic Any	0.5%	0.7%	0.3%	1.5%										
American Indian or Alaska Native Only	0.0%	0.2%	0.0%	0.3%										
White Only	-0.7%	1.6%	-0.8%	0.2%										
Hawaiian or Pacific Islander Only	0.0%	0.1%	-0.1%	0.0%										
Two or More Races	0.3%	0.1%	-0.1%	0.3%										
Non-Resident Alien	0.3%	0.1%	0.0%	0.3%										
Unknown	0.0%	-5.9%	-0.1%	-6.0%										
TOTAL	0.0%	0.0%	0.0%	0.0%										

Age: The age distribution over the past five years reveals contrasting trends for the
two sectors. Not surprisingly, 61.9 percent of 4-Year University students and 70.5
percent of private institution students are in the traditional-aged bracket (18-24
years), while less than one-half (42.6 percent) of 2-Year College students are in this
age bracket.

		2011 Fall		
Age Category	4-Year Universities	2-Year Colleges	Private Institutions	Total
Less Than 18	7.2%	15.1%	5.6%	9.8%
Age 18 - 19	24.8%	18.5%	32.7%	23.4%
Age 20 - 24	37.4%	23.7%	36.4%	32.5%
Age 25 - 34	18.3%	23.1%	11.7%	19.3%
Age 35 - 44	7.7%	11.5%	7.5%	9.0%
Age 45 - 54	3.4%	5.6%	4.2%	4.3%
Age 55 or Older	1.2%	2.6%	1.9%	1.8%
Total	100.0%	100.0%	100.0%	100.0%

The below table shows that students enrolled in the 2011 Fall term are slightly older than those enrolled in the 2007 Fall term.

Age Category	Fall 2007	Fall 2011	Change
Less Than 18	9.7%	9.8%	0.1%
Age 18 - 19	23.9%	23.4%	-0.5%
Age 20 - 24	32.9%	32.5%	-0.4%
Age 25 - 34	18.9%	19.3%	0.4%
Age 35 - 44	8.6%	9.0%	0.4%
Age 45 - 54	4.3%	4.3%	0.0%
Age 55 or Older	1.7%	1.8%	0.1%
Total	100.0%	100.0%	0.0%

 Attendance Status: Since fall 2007, the overall percent of full-time students has increased. The full-time attendance status at 4-year universities and private institutions is decreasing while the full-time attendance status at 2-year colleges is increasing.

Institution Type	Fall 2007	Fall 2011	Change
4-Year Universities	71.7%	70.7%	-1.0%
2-Year Colleges	45.5%	49.1%	3.6%
Private Institutions	80.4%	77.7%	-2.6%
Total	63.6%	63.7%	0.2%

- **Double Enrollments**: A total of 2,678 students were enrolled in two or more institutions in fall 2011. This represents a 3.4 percent decrease (from 2,771) from last year.
- **Geographic Origin**: For all public institutions, 86.4 percent of the students enrolled in the fall 2011 semester at Arkansas universities and colleges are from Arkansas (87.5 percent in fall 2010).
- Distance Learning: Based on institutions reporting coursework delivered via distance learning, 4,281 classes (up from 4,104 the previous year) were offered in fall 2011 representing a growth of 4.3 percent. There were 78,396 enrollments (up from 75,079 the previous year) in these courses representing a growth of 4.4 percent.

Pulaski Technical College led with 524 courses, followed by the University of Arkansas at Little Rock with 508 courses, and Arkansas State University Jonesboro with 434 courses available through distance education.

- Statewide, 45,021 different (unduplicated) students enrolled in distance learning courses in fall 2011. This represents an increase of 1,463 students or 3.4 percent.
- The average enrollment was 18.3 students per class.
- Students were enrolled in an average of 1.7 distance education courses.
- Off-schedule courses: In order to ensure that institutions receive credit in the funding formula for a full year of student semester credit hours (SSCH) that they produce and in recognition that many institutions offer courses that meet according to a schedule that varies from the traditional fall-spring-summer calendar, ADHE has collected data concerning off-schedule courses and enrollments through a special reporting process. Through this process, short-courses and other courses that begin after the census date are reported and the resultant SSCH are tabulated and included for funding purposes. Without such a process, institutions that attempt to reach more students by making their courses more available, at times that are more convenient to students, would be penalized by losing state-funding for the SSCH that are generated by these courses.

#### Fall SSCH and FTE

SSCH and FTE are highly related as SSCH is usually divided by a pre-determined factor to determine FTE. For undergraduates, SSCH is divided by 15 to determine undergraduate FTE, whereas SSCH is divided by 12 to determine graduate FTE. However, to determine First Professional FTE, the IPEDS method of using fall student headcounts is used in this report. This method counts all full-time students as 1 FTE and all part-time students as 0.6 FTE.

Fall FTE (full-time equivalents) has increased over the last five fall terms (from Fall 2007 to Fall 2011 Fall) by 17.8 percent to a total of 116,257 FTE. This is a one-year increase of 2.0 percent.

### <u>Undergraduate SSCH/FTE</u>

The 4-year universities with the greatest volume of undergraduate SSCH/FTE were:

- 1. University of Arkansas Fayetteville 259,883 SSCH and 17,326 FTE
- 2. University of Central Arkansas 128,193 SSCH and 8,546 FTE
- Arkansas State University Jonesboro 127,189 SSCH and 8,479 FTE

The top three 4-year universities with the highest 1-year increase in undergraduate fall SSCH/FTE were:

- 1. University of Arkansas Fayetteville 11.4 percent
- 2. University of Arkansas at Monticello 6.1 percent
- 3. Arkansas Tech University 4.2 percent

The top three 4-year universities with the highest 5-year increase in undergraduate fall SSCH/FTE were:

- 1. University of Arkansas Fayetteville 30.9 percent
- 2. University of Arkansas at Fort Smith 25.5 percent
- 3. Arkansas Tech University 24.0 percent

The 2-year colleges with the greatest volume of undergraduate SSCH/FTE were:

- 1. Pulaski Technical College 119,698 SSCH and 7,980 FTE
- Northwest Arkansas Community College 76,138 SSCH and 5,076 FTE
- 3. Arkansas State University Beebe 46,856 SSCH and 3,124 FTE

The top three 2-year colleges with the highest 1-year increase in undergraduate fall SSCH/FTE were:

- 1. SAU Tech 14.3 percent
- National Park Community College 9.8 percent
- 3. Pulaski Technical College 7.2 percent

The top three 2-year colleges with the highest 5-year increase in undergraduate fall SSCH/FTE were:

- 1. Arkansas State University Newport 100.4 percent
- 2. Mid-South Community College 53.9 percent
- 3. Ozarka College 47.0 percent

### Graduate SSCH/FTE

The 4-year universities with the greatest volume of graduate SSCH/FTE were:

- 1. University of Arkansas Fayetteville 25,454 SSCH and 2,121 FTE
- 2. Arkansas State University Jonesboro 18,526 SSCH and 1.544 FTE
- 3. University of Arkansas at Little Rock 15,679 SSCH and 1,307 FTE

The top three 4-year universities with the highest 1-year increase in graduate SSCH/FTE were:

- 1. Arkansas Tech University 10.6 percent
- 2. Southern Arkansas University at Magnolia 8.6 percent
- 3. Arkansas State University Jonesboro 8.0 percent

The top three 4-year universities with the highest 5-year increase in graduate SSCH/FTE were:

- 1. Arkansas State University Jonesboro 96.2 percent
- 2. Southern Arkansas University at Magnolia 31.3 percent
- 3. Arkansas Tech University 27.7 percent

#### **Annual SSCH and FTE**

SSCH and FTE are highly related as SSCH is usually divided by a pre-determined factor to determine FTE. For undergraduates, annual SSCH is divided by 30 to determine annual undergraduate FTE, whereas annual SSCH is divided by 24 to determine annual graduate FTE. However, to determine First Professional FTE, the IPEDS method of using fall student headcounts was used. This method counted all unduplicated annual full-time students as 1 FTE and all unduplicated annual part-time students as 0.6 FTE.

Annual FTE (full-time equivalents) has increased over the last five years (from Academic Year 2007 to Academic Year 2011) by 22.2 percent to a total of 126,679 FTE. This is a one-year increase of 4.3 percent.

### <u>Undergraduate SSCH/FTE</u>

The 4-year universities with the greatest volume of undergraduate annual SSCH/FTE were:

- 1. University of Arkansas Fayetteville 498,737 SSCH and 16,625 FTE
- 2. Arkansas State University Jonesboro 275,134 SSCH and 9,171 FTE
- 3. University of Central Arkansas 272,110 SSCH and 9,070 FTE

The top three 4-year universities with the highest 1-year increase in undergraduate annual SSCH/FTE were:

- 1. University of Arkansas Fayetteville 10.2 percent
- 2. Henderson State University 8.9 percent
- 3. Arkansas Tech University 7.0 percent

The top three 4-year universities with the highest 5-year increase in undergraduate annual SSCH/FTE were:

- 1. University of Arkansas at Fort Smith 25.4 percent
- 2. Arkansas Tech University 25.0 percent
- 3. University of Arkansas Fayetteville 24.4 percent

The 2-year colleges with the greatest volume of undergraduate annual SSCH/FTE were:

- 1. Pulaski Technical College 253,095 SSCH and 8,437 FTE
- Northwest Arkansas Community College 173,282 SSCH and 5,776 FTE
- 3. Arkansas State University Beebe 106,830 SSCH and 3,561 FTE

The top three 2-year colleges with the highest 1-year increase in undergraduate annual SSCH/FTE were:

- 1. Ozarka College 23.3 percent
- 2. Black River Technical College 16.5 percent
- Pulaski Technical College 8.4 percent

The top three 2-year colleges with the highest 5-year increase in undergraduate annual SSCH/FTE were:

- 1. Ozarka College 80.5 percent
- 2. Arkansas State University at Newport 70.2 percent
- 3. Northwest Arkansas Community College 61.3 percent

### Graduate SSCH/FTE

The 4-year universities with the greatest volume of graduate annual SSCH/FTE were:

- 1. Arkansas State University Jonesboro 79,772 SSCH and 3,324 FTE
- 2. University of Arkansas Fayetteville 65,649 SSCH and 2,735 FTE
- 3. University of Arkansas at Little Rock 37,730 SSCH and 1,572 FTE

The top three 4-year universities with the highest 1-year increase in graduate annual SSCH/FTE were:

- 1. Arkansas State University Jonesboro 46.4 percent
- 2. Arkansas Tech University 14.4 percent
- 3. University of Arkansas Fayetteville 4.6 percent

The top three 4-year universities with the highest 5-year increase in graduate annual SSCH/FTE were:

- 1. Arkansas State University Jonesboro 218.3 percent
- 2. Southern Arkansas University at Magnolia 54.6 percent
- 3. University of Arkansas at Pine Bluff 26.3 percent

## ANNUAL REPORT ON FIRST-YEAR STUDENT REMEDIATION

Attachments Attachment 2-1 **Anytime Remediation Rates** Anytime Remediation Rates by Year for Five (5) Fall Terms Attachment 2-2 (2007 Fall – 2011 Fall) Attachment 2-3 Anytime Remediation Rates for MATH Anytime Remediation Rates for ENGLISH Attachment 2-4 Attachment 2-5 Anytime Remediation Rates for READING Attachment 2-6 Anytime Remediation Rates by Gender Attachment 2-7 Anytime Remediation Rates by Race/Ethnicity Attachment 2-8 Anytime Remediation Rates by Age Attachment 2-9 Anytime Remediation Rates by Attend Status 2-Year Remediation Rates Attachment 2-10 Attachment 2-11 1-Year Remediation Rates Attachment 2-12 Anytime Remediation Rates by County of Residence 2-Year Remediation Rates by County of Residence Attachment 2-13 1-Year Remediation Rates by County of Residence Attachment 2-14 Attachment 2-15 Anytime Remediation Rates by High School District Attachment 2-16 2-Year Remediation Rates by High School District Attachment 2-17 1-Year Remediation Rates by High School District Act 970 Report on Remediation Rates of Students with High Attachment 2-18 School GPA of 3.00 or Higher Remediation Attempts: How Many Times a Student was Attachment 2-19 Enrolled in a Remedial Course Remediation Attempts: For Students that Passed, How Many Attachment 2-20 Attempts Did It Take to Pass

Since 1988, all entering first-year students seeking an associate degree or higher from an Arkansas public college or university must meet AHECB assessment and placement standards in the disciplines of English, mathematics, and reading. A cut-off subscore of 19 on the ACT exam (or the equivalent on the ASSET, SAT, or COMPASS tests) is used for each of the three areas. Attachments 2-1 and 2-2 offer a general overview of remediation in Arkansas public higher education, while Attachments 2-3, 2-4, and 2-5 provide institutional detail by discipline for the terms of 2007 Fall through 2011 Fall. In all tables, remedial data are based on students who meet two criteria: (1) not meeting the board's cut-off score; and (2) being assigned to developmental-level coursework.

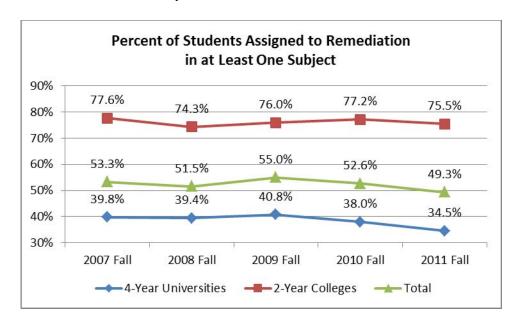

Traditionally, ADHE has calculated remediation rates for any and all first-time entering students. However, the legislature passed Act 970 in 2009 which required remediation rates to be calculated on students that had graduated high school within the past two years prior to entering college and the legislature conducted an interim study during 2010 in which ADHE was requested to calculate remediation rates on students that had graduated high school in the previous 12 months. Therefore, ADHE is publishing remediation calculations using three slightly different methodologies:

- 1. Anytime Rates rates in which the high school graduation date is ignored
- 2. <u>2-Year Rates</u> rates in which the student graduated high school in the previous 2 years
- 1-Year Rates rates in which the student graduated high school in the previous 1 year

### **Statewide Overview**

In fall 2011, Arkansas's public institutions enrolled 23,253 first-time degreeseeking students. 23,176 of those students were tested for placement purposes.

 Of the 23,176 students who were tested, 11,436 students (49.3 percent) were assigned to one or more remedial courses while the balance were placed in college-level coursework. This represents a decrease in the remediation rate of 3.3 percentage points from fall 2010. Note that this is the lowest remediation rate in the 5-years reviewed.

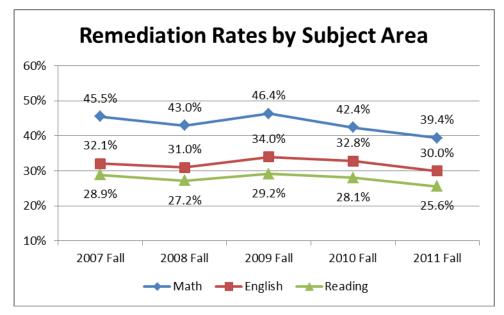

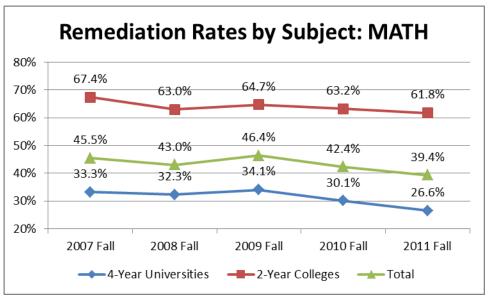

- Of the 11,436 students assigned to remediation, 5,101 (44.6 percent) were in the four-year sector and 6,335 (55.4 percent) were in the two-year sector.
- Over the last five years, the number of students assigned to remedial coursework has increased by 100 students (2.0 percent) at 4-Year

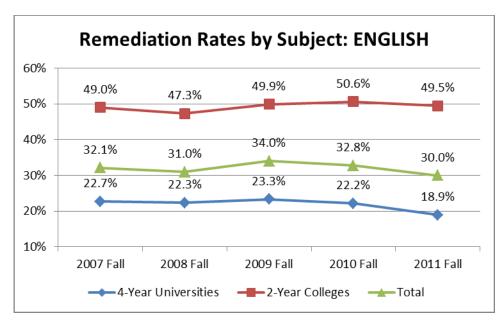

Universities, whereas, the number of students assigned to remediation has increased by 915 students (16.9 percent) at 2-Year Colleges, and by 1,015 students (9.7 percent) at all public institutions.

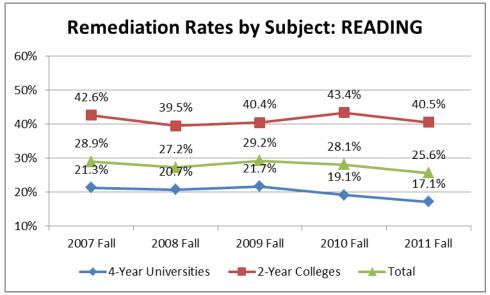

### Remediation Rates by Subject Area

- From last year, the remediation rate for all three subject areas have decreased:
  - Math a decrease of 3.0 percentage points;
  - English a decrease of 2.8 percentage points; and
  - Reading a decrease of 2.5 percentage points.

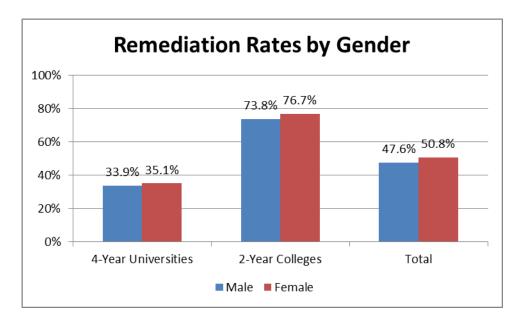

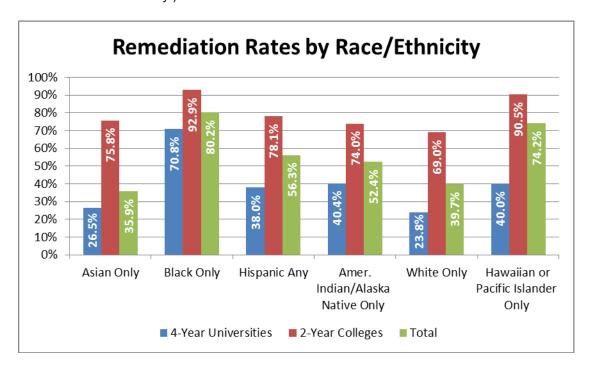

### **Remediation Rates by Demographics**

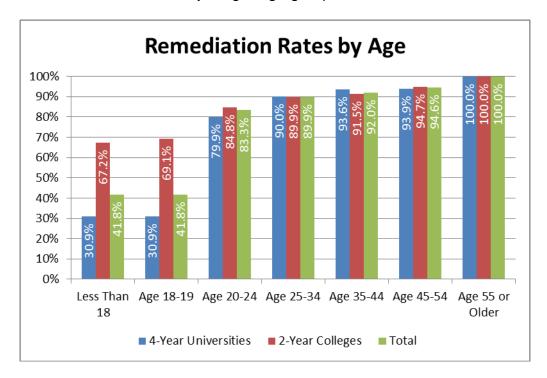

• <u>Gender</u>: As the graph below illustrates, remediation rates for females are only slightly higher than that of males.

 <u>Race/Ethnicity</u>: Regarding remediation rates by race and ethnicity, students of the Asian race have the lowest remediation rates followed by White, American Indian/Alaskan Natives, Hispanic, Hawaiian and Pacific Islanders, and Black. (Note that the race/ethnicities are actually defined as Asian Only, Black Only, Hispanic Any, American Indian and Alaskan Natives Only, White Only, and Hawaiian and Pacific Islanders Only.)

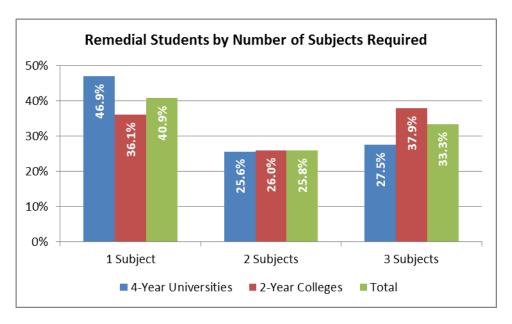

• Age: Students in age groups 20 and above have substantially higher remediation rates that the younger age groups.

• <u>Attend Status</u>: Full-time students have substantially lower remediation rates than part-time students.

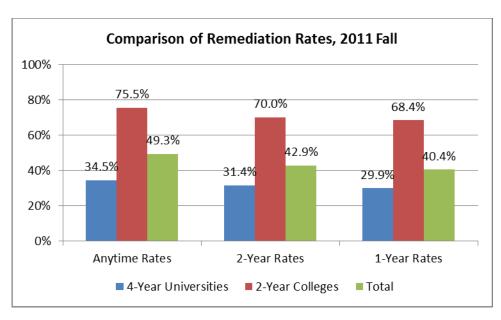

Most students require remediation in one subject only, but many also require remediation in all three subject areas.

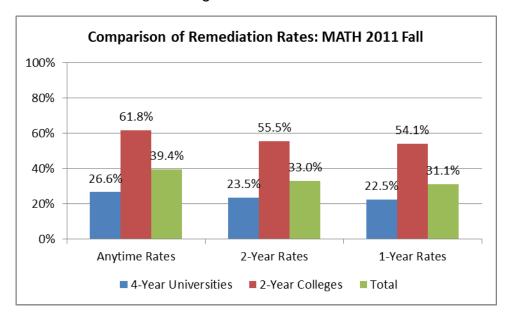

### **Anytime Rates as Compared with 2-Year Rates and 1-Year Rates**

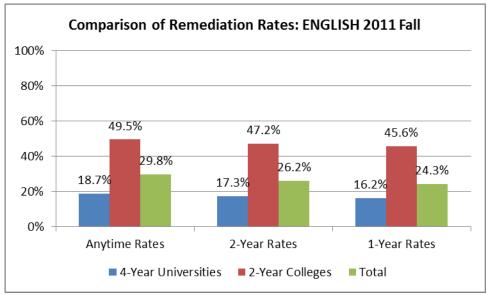

As mentioned previously, due to legislative input ADHE is including data on three different types of remediation rates:

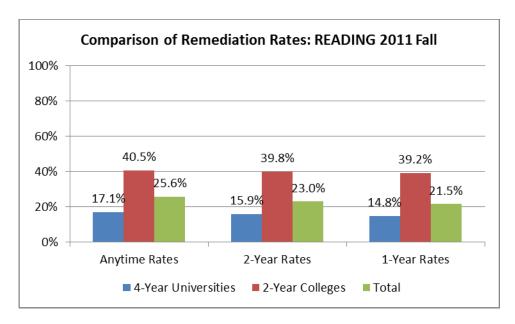

- 1. Anytime Rates rates in which the high school graduation date is ignored
- 2. <u>2-Year Rates</u> rates in which the student graduated high school in the previous 2 years
- 3. <u>1-Year Rates</u> rates in which the student graduated high school in the previous 1 year

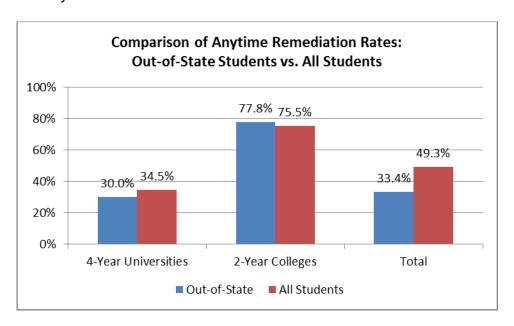

As noted above in the section on remediation rates by age, the longer the time period that a student has been out of high school, the greater the chance the student needs to be remediated. This situation is true for both the 4-Year Universities and the 2-Year Colleges.

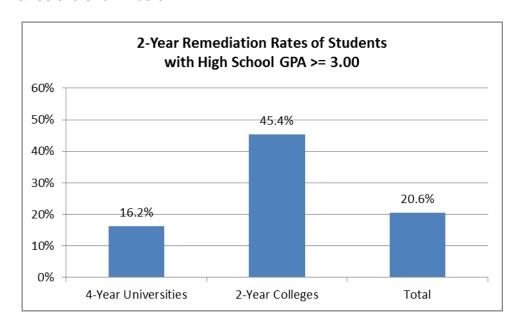

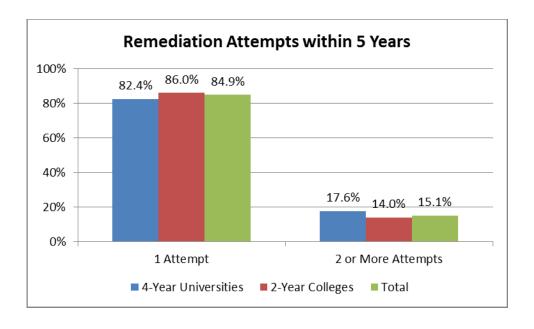

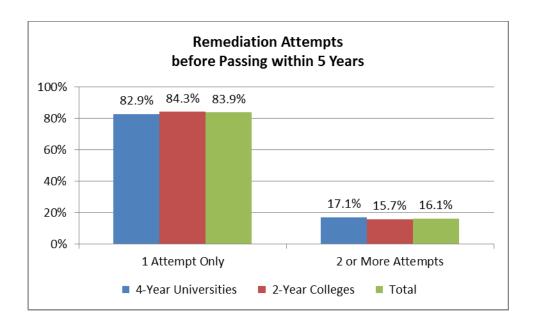

The remediation rates discussed above relate to all students. However, the below chart shows the remediation rate of out-of-state students against the traditional anytime remediation rate for the 2011 Fall term.

Act 970 of 2009 required additional calculations regarding remedial students. (1) The first of these new calculations is the remediation rate of recent high school students that graduated high school with a GPA (grade point average) of 3.00 or higher. (2) The second new calculation is a determination of how many times it takes a student to pass a remedial course. The complete reports for these new calculations are shown in the attachments, whereas graphical summaries are shown below.

- 1. <u>First-Time Students</u> these are students that enrolled in college for the first-time (they have never before attended college). This includes students that are seeking an associate or bachelor's degree only. Certificate-seekers are not included.
- 2. <u>Test Takers</u> this is a subset of First-Time Students that took the ACT, SAT, Asset, or Compass exam.
- 3. <u>GEO\_County</u> the county is determined by GEO\_COUNTY, the student's legal residence at the time of admission to the institution. Only Arkansas counties are included.
- 4. Counts of less than 10 are hidden due to FERPA.

Academic Year = 2012 (Fall Term Only), Students graduated from High School in Anytime.

### NOTES:

- 1. <u>First-Time Students</u> these are students that enrolled in college for the first-time (they have never before attended college). This includes students that are seeking an associate or bachelor's degree only. Certificate-seekers are not included.
- 2. <u>Test Takers</u> this is a subset of First-Time Students that took the ACT, SAT, Asset, or Compass exam.
- 3. Counts of less than 10 are hidden due to FERPA.

Remediation Rates for Students Graduating High School within the Last 2 Years
Academic Year = 2012 ( Fall Term Only), Students graduated from High School in 2010 or 2011.

### NOTES:

<sup>1. &</sup>lt;u>First-Time Students</u> - these are students that enrolled in college for the first-time (they have never before attended college). This includes students that are seeking an associate or bachelor's degree only. Certificate-seekers are not included.

<sup>2. &</sup>lt;u>Test Takers</u> - this is a subset of First-Time Students that took the ACT, SAT, Asset, or Compass exam.

<sup>3.</sup> Counts of less than 10 are hidden due to FERPA.

### Remediation Rates for Students Graduating High School within the Last Year

Academic Year = 2012 (Fall Term Only), Students graduated from High School in 2011.

#### NOTES:

- 1. <u>First-Time Students</u> these are students that enrolled in college for the first-time (they have never before attended college). This includes students that are seeking an associate or bachelor's degree only. Certificate-seekers are not included.
- 2. Test Takers this is a subset of First-Time Students that took the ACT, SAT, Asset, or Compass exam.
- 3. Counts of less than 10 are hidden due to FERPA.

## ACT 970 of 2009 Remediation Rates of Students with High School GPA >= 3.00

Academic Year = 2012 ( Fall Term Only), Students graduated from High School in 2010 or 2011

### NOTES:

<sup>1. &</sup>lt;u>First-Time Students</u> - these are students that enrolled in college for the first-time (they have never before attended college). This includes students that are seeking an associate or bachelor's degree only. Certificate-seekers are not included.

<sup>2.</sup> Test Takers - this is a subset of First-Time Students that took the ACT, SAT, Asset, or Compass exam.

## **Remediation Attempts**

Number of Times the Same Student was Enrolled in the Same Remedial Course during a 5-Year Period

Academic Year = **2011** for students enrolled in AY2007 - AY2011.

NOTE: This does not take into account whether or not the student(s) passed the remedial course, but is only the number of times the course was taken.

Appendix E: 2010 FAP Summary	62

### The Financial Condition of Arkansas Institutions of Higher Education

### Introduction

The purpose of this report is to describe the financial condition as well as the difficulties and dilemmas experienced by Arkansas's Public Institutions of Higher Education. These difficulties and dilemmas have been brought on by a number of competing, and often conflicting demands: increasing enrollments; lagging, and even declining, state support; increasing public and political pressure to hold tuition down; and students who come to college with the expectations of new amenities and programs from the institutions.

This financial conditions report will address several topics including the equity of the funding formulas, revenues versus costs in higher education, the impact of lottery scholarships and funds per FTE student, the increased volume of construction on campuses, a comparison of Arkansas faculty salaries to other SREB states and various charts and graphs on tuition and fees by institution, expenditures by function, fund balances, operating margins, athletic incomes and expenditures, scholarship expenditures and measures of performance. It will also include some recommendations for future financial policies of the Arkansas Higher Education Coordinating Board.

## Why Funding Formulas – The Only Basis for Funding Equity

The funding formulas are an equitable means of determining needs based on student semester credit hours by course cost and degree level. The funding formulas also take into account the amount of square footage needed to accommodate these hours. There are several points regarding funding formulas that must be clarified. First, everyone must come to realize **that dollars per FTE is not a reasonable measure of equity** since FTEs do not cost the same to produce – nursing is more expensive to teach than history. Many people look at cost per fulltime equivalent (FTE) student because it is easy to understand, but it is not a good or fair comparison for state funding among institutions. The credit hour productions among the various disciplines and levels differ significantly in terms of the cost of producing those hours. An expensive program, such as engineering, does not increase the need for funding unless there are a significant number of credit hours

produced from the engineering program. Similarly having a doctoral program does not increase funding need unless the institution is producing credit hours at the doctoral level. The level of a course is not determined by the classification of the student taking the course. It is determined by the content of the course. An upper level undergraduate course taken by a doctoral student does not become doctoral credit hours just because the student enrolled is pursuing a doctorate. Also, an institution's funding does not increase automatically when the institution moves to a higher SREB classification i.e. from bachelor to masters.

As we learned from the Lakeview case and the associated public school formula litigation, some **recognition must be given** to schools in **economically depressed** regions of the state. Studies show that students entering college from economically depressed areas generally require additional academic support staff in the form of counselors and tutors in special labs. This results in additional costs to the institutions and must be supported in the funding formula.

Act 1760 of 1985 states that no two-year college may receive less funding in the recommendation than received the previous year. However, when enrollment losses resulting from population losses do occur in economically depressed areas of the state, it serves to make the dollars per FTE increase significantly even though total funding to the institution from the state remains unchanged. This act was repealed in the most recent legislative session and may affect future funding distributions (Act 1203 of 2011).

Does the formula reward an institution for losing enrollment? No. The formula reacts to changes in enrollment by reducing the funding need in direct proportion to the enrollment which is lost. However, when the recommendations for the distribution of new money are made, the recommendations must **not** result in a reduction in funding (according to Act 1760 of 1985). In addition, the recommendations often must include a cost-of-living adjustment. This would seem to make the resulting recommendations more a function of public policy than a function of the formula. The differences in funds per FTE are often not so much a function of the funding formula as a result of legislative decisions which

have historically "held harmless" institutions that lost enrollment (Act 1760). Of course as pointed out earlier, this legislation has been repealed.

Arkansas Code §6-61-223 & 224 require funding formulas to include an economy-of-scale. The economies-of-scale adjustment serves to recognize cost savings that benefit larger schools. The additional funds are not needed for each additional FTE as they were for the first student enrolled. All colleges must have a core staff regardless of the number of students who are enrolled – a registrar, a financial aid officer, a chief financial officer, a chief academic officer, a chief student affairs officer, an accounting staff, a computing staff and a minimum number of full-time faculty in each of the general education disciplines. These costs are the same for each school, but when the costs are divided by a smaller number of FTE, the result is a higher expenditure per FTE.

Another point to clarify is that small schools are very expensive to operate; however, that does not mean they are inefficient. In looking into efficiency it is more appropriate to look at the ratio of students-to-authorized administrative positions based on headcount rather than the funds per FTE.

Four changes to the formula enacted into law by Act 1760 were proposed by the two-year college presidents and chancellors and the Arkansas Higher Education Coordinating Board.

The first of those proposed changes would increase relative funding provided for nursing. Since increasing the number of nursing graduates is one of the state's priorities for higher education, is this a reasonable change? Is it reasonable to bring nursing funding more in line with the actual cost of nursing programs? Is it reasonable to bring the formula requirements more in line with the state nursing board student to faculty ratio? The needs-based component of the funding formula should address relative costs, not state's priorities. State priorities should be addressed in the outcome-centered component as addressed by Act 1203 of 2011.

The second proposed change was to amend the part-time faculty adjustment to more nearly reflect the actual practice of the colleges. The larger colleges are located in areas of the state where the economy is expanding and they have access to a much larger base of qualified adjunct faculty. Hence, they have been teaching more than 50 percent of their classes with adjunct faculty. The small schools located in less populous areas consequently have access to fewer qualified adjunct faculty, and their utilization of adjunct faculty reflects that. They are producing an average of 30 percent of their credit hours with adjunct faculty. Adjunct faculty certainly cost the institution less money than full-time faculty but does the use of adjunct faculty cost more to the State? Research shows that students who have part-time faculty are less likely to be retained, they are less likely to graduate and they are less likely to major in an area where their first class in the subject area was taught by a part-time faculty member.

The third change was to introduce a model, adapted from another state, to determine the space needs of each college based upon their enrollment and the types of programs offered for the basis of determining funding needs for facilities maintenance and operations. The old formula simply used an arbitrary 161 square feet per FTE student without regard to differing needs of various space and/or intensive academic programs.

The statutes require that the formulas have an economy of scale built into them recognizing that the marginal students cost proportionately less after a certain critical size is attained. Therefore, the final proposed change was to introduce an economy of scale into the institutional support portion of the formula which would recognize that every school regardless of size must have a critical mass of staff and faculty in order to open its doors. The proposed change would cut the percent for institutional support from 18 percent to 15 percent for institutions with more than 3,000 FTE enrollment (which is a widely accepted break point in economies of scale).

Most funding formulas recognize differences in costs among schools and among programs. Should the funding formulas also reflect the states goals for higher education? In Arkansas, costs differences occur due to the institution's location, size, age and number of buildings, mission, and demographics. Although the current funding formula

addresses many of these areas, there are some differences that are difficult to address. In an attempt to address the states goals for higher education and focus more on graduating more students, the funding formula was changed for the 2009-11 biennium so that the ratio of SSCH used in the formula was based on 90 percent census-date enrollment data and 10 percent end-of-term (EOT) enrollment data. The next step of that phase was for the 2011-13 biennium in which the 90 percent was decreased to 80 percent census-date enrollment data and increased from 10 percent to 20 percent end-of-term enrollment data. As mentioned earlier with the passing of Act 1203 of 2011 and Board Policy, State goals for graduating students (EOT) will be addressed by an outcome-centered component beginning in 2013-2014, and the needs-based component will address need based on 100 percent census-date enrollment data. The 80 percent census and 20 percent end-of-term enrollment data will no longer be used in the needs-based component.

Are students in economically depressed areas to be denied equal access to higher education? If we want to 1. increase access 2. ensure equal access 3. increase graduates in nursing, math, and science4. keep tuition low5. improve the economy of Arkansas6. improve the quality of life of Arkansans, then the funding formula must recognize that some of these things cost more per student for small schools than they do for large schools located in populous and economically advantaged regions of the state.

### **Revenue versus Cost in Higher Education**

Every organization – whether it is for-profit, nonprofit, or government – faces the same financial imperative: It must cover its financial outflows (costs or expenditures) with financial inflows (revenues). Although deficits can occur, they cannot be maintained forever. The one exception to this rule may be the federal government, which has the power to tax and print currency – even these actions have political limits. Every other type of organization must choose a cash-flow strategy that ensures that revenues will at least cover its expenditures and debt service. – *Robert E. Martin, "Revenue-to-Cost Spiral in Higher Education"* 

Colleges and universities represent a specific type of nongovernment cash-flow strategy. Higher education is composed of state-supported colleges and universities, private

nonprofit schools, and a small but increasing number of for-profit schools. State-supported schools are the largest component. While they are part of state governments, they are virtually the same as private higher education in terms of their cash-flow management problems, governance structures, role of third-party payers, and the services they provide.

The foregoing was presented to establish that colleges and universities, whether state-supported or private non-profit institutions, must make certain that their revenues cover their expenditures and debt service. That presents unique problems for state-supported colleges and universities. Unlike businesses which see their sales and profits decline during an economic downturn, state-supported colleges and universities experience five things during economic downturns: enrollments increase because of layoffs and unemployment; state revenues decline thereby reducing state support; tuition and fees increase to cover the lost state support; costs increase due to the additional students; and inflation.

Too often, legislators and the public fail to realize that the demand for services experienced by colleges and universities is the inverse of for-profit businesses. While businesses are laying off employees, colleges and universities are forced to hire new faculty and support staff (admissions staff, financial aid staff, etc.) to meet the demands of new enrollments. As businesses are cutting expenses, state supported colleges and universities must increase expenditures if they are to provide services to the larger student body. For example, if state support makes up 50 percent of the funding for higher education and tuition and fees make up the other 50 percent, and no new state dollars are received for higher education, then any cost of living increases or inflation must be balanced by reducing costs/services or by increasing tuition and fees. If inflation increases by 3 percent, tuition and fees must increase 6 percent or costs/services must be cut by 6 percent.

Often, the response of state lawmakers is to encourage the institutions to seek private funds to replace lost state support. However, private donors are unwilling to give to support the ordinary operating expenses associated with educating the students

(unrestricted educational and general funds) because they consider those things the responsibility of the state and there is no notoriety or recognition associated with donations for operating expenses. They are willing to give to a building fund (to be able to name the building or a room) and to sponsor a specific type of research program that has the potential of benefitting their business, or them personally, but such funds are considered restricted funds since their use is designated by the donor. These funds provide no relief for the overburdened unrestricted educational and general needs of the institution.

Successive economic downturns such as that experienced after September 11, 2001 and during 2008 and 2009 have been devastating for Arkansas higher education, in that institutions are spending less per student from all sources of revenue. During that same time period the enrollment growth in Arkansas has been one of the highest in the SREB and in the nation. The Delta Cost Study summed it up this way –"students are paying more and getting less." Higher education is losing the battle with the combination of more students, less state funding and tuition rates that exceed inflation. State legislatures and the U.S. Congress are considering legislation to control the only avenue available to institutions to cover their expenditures – tuition and fees. Several recent studies show that the institutions are actually spending less per student than they did 10 or 20 years ago in constant dollars, which makes the idea of cutting expenditures less than plausible.

The little cost cutting that has occurred has been in the form of using adjunct faculty to replace full-time faculty. This is usually an undesirable action since most adjunct are less qualified and has less teaching experience than a full-time faculty. In addition, studies show that students whose first course is taught by an adjunct are less likely to major in that discipline; are less likely to be retained, and are less likely to graduate. Another undesirable action is to forego the maintenance of facilities allowing for huge deferred maintenance accumulations that represent a high percentage of the replacement value of the facilities. These things are not only true for Arkansas; they are true nationally as well. Some of the impacts of declining state funds per FTE student on Arkansas Higher Education are:

- Tuition and fee increases
- Reduced access
- No Progress on Equity Funding Issues
- Outdated Instructional Equipment
- Reduced Ability to Attract External Funding
- Inability to Recruit and Retain Faculty/Staff
- Further Deterioration of Facilities
- Worst Case Scenarios: Enrollment Caps, Loss of Accreditation, No New Programs, Lost jobs
- Program Eliminations and Reduction in Public Service.

## **Funds per FTE Student from All Sources**

Table 88 of the *SREB Factbook on Higher Education* published in September 2011 shows that, in spite of relatively large tuition increases, the total funds available per FTE student in Arkansas's universities, when adjusted for inflation, increased by 7.9 percent in the five year period from 2004-05 to 2009-10. Florida experienced the greatest decrease for this period at around at 4.6 percent. Texas had the greatest gain in funding available per FTE student, a 40.3 percent increase. For 2009-10 Arkansas's universities ranked eleventh (10<sup>th</sup>) in state funding and twelfth (12<sup>th</sup>) in tuition and fee revenues per FTE student in the SREB region.

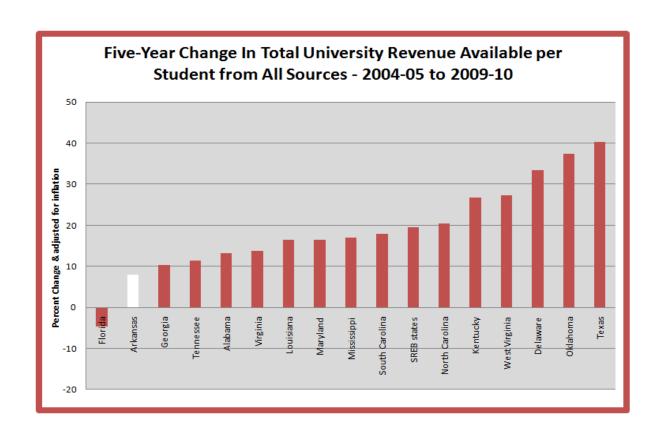

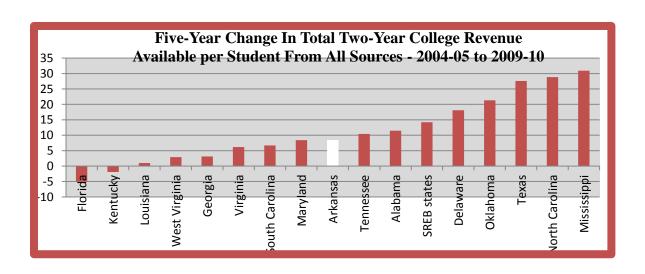

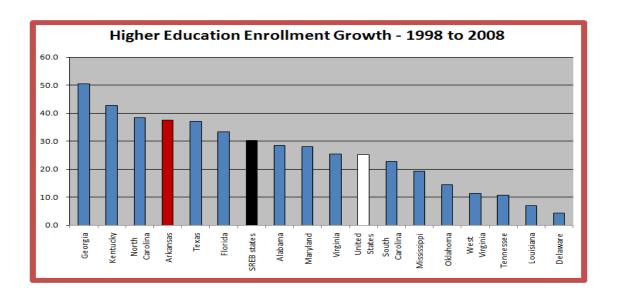

Table 80 of the <u>SREB Factbook on Higher Education</u> contains the comparable data for Two-Year Colleges. Although the two-year schools fared slightly better than the universities, their funds per FTE student increased approximately 8.5 percent, when adjusted for inflation, over the same five year period. Florida and Kentucky experienced a decline for the period 2004-05 to 2009-10. Mississippi had the largest increase at 30.9 percent.

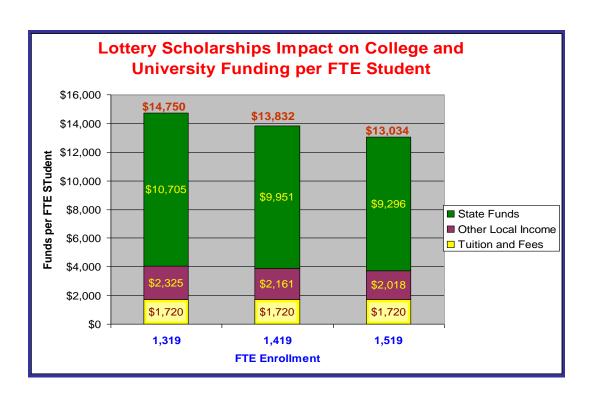

From 1998 to 2008 the enrollment growth (Table 18) in Arkansas Higher Education was the fourth highest percentage increase at 37.6 percent. The average growth rate in the SREB states was 30.2 percent and the national average growth rate was 25.2 percent. Of course the rapid growth in Arkansas Higher Education since the 2008-09 year will only serve to increase the decline in funds per FTE. Delaware had the smallest percent increase which is a partial explanation of their growth in funds per FTE from the previous report.

### **Arkansas Scholarship Lottery and Funds per FTE Student**

There seems to be a wide spread belief that the Arkansas Academic Challenge Scholarships funded in part by the Arkansas Scholarship Lottery will improve the finances of the institutions of higher education in Arkansas. While it is true that the institution will have some greater tuition revenue with an increase in enrollment, the funds available to educate each student will decline without a related increase in state appropriations. The next chart illustrates the impact of an additional 100 and an additional 200 FTE students on the funds per FTE student at a small institution. The first 100 additional students will results in the institution having \$918 less per student to pay for the cost of educating each student. With 200 additional students the institution will have \$1,716 less to spend per FTE student. Note that other local income is not enrollment driven and the revenues will remain virtually the same regardless of enrollment.

The Arkansas Academic Challenge Scholarships are wonderful for students and their parents but they hardly represent a financial windfall for the institutions of higher education, especially in a time of economic downturns when state revenues for the support of higher education are declining. If a student enrolls in the institution, someone must pay the tuition. Who pays that tuition is irrelevant to the institution as far as the institutions finances are concerned. It is the same without regard to who pays whether it is the students, their parents or provided by a scholarship. The value of the increased scholarship availability lies in the expectation that the Academic Challenge Scholarships will allow many students to remain in college who would have otherwise dropped out without completing their degrees. Extending the Arkansas Academic Challenge Scholarship to non-traditional students should encourage many students to enroll who did not do so directly from high school and thereby increase the number of adults with a college degree.

It is the unfounded belief that the Academic Challenge Scholarships can replace the state funding of higher education, which is damaging to the funding of higher education. The Academic Challenge Scholarships do not improve the funding results of the SREB study and will only accelerate the decline in funds available to educate each student. That is not to demean the Academic Challenge Scholarships but to point to the need for state funding to follow the students.

## The Reason for the Volume of Construction on University and College Campuses in Arkansas

Arkansas universities are making a concerted effort to be good stewards of the facilities that the state and private donors have funded. These facilities require continued maintenance and renovations throughout their existence. Today, 53 percent of the university facilities are more than 30 years old. After a facility has reached the 30-year mark, most of the life expectancy of the building systems has elapsed. The average Facilities Condition Index (FCI) for 2010 for Arkansas's educational and general facilities is 54 percent, meaning 54 percent of the life expectancy of the average facility has passed. The national literature states that when the FCI for a campus exceeds 15

percent it should raise a red flag that signals that the facility's maintenance needs improvement and a dedicated source of funding.

In response to the huge accumulated deferred maintenance, universities are renovating many older facilities whose FCI is much higher than 50 percent. The choice between renovating a facility and replacing it is based upon the relative cost of the two options. Often the cost of renovation exceeds the cost of a new facility.

With the Higher Education Bond Issue of \$150 million and local funds the universities have reduced their critical maintenance needs by \$57.7 million since the 2008 facilities audit. Facilities square footage for all universities has only increased by 179,000 since 2008. That number is a further indication that a great deal of construction was for the replacement of facilities that cost too much to renovate and/or for auxiliary (income producing facilities).

Why is all this renovation and new construction necessary? Today's students are coming to the universities to learn that their high schools had better and more modern labs and equipment than the universities. Many universities' laboratory facilities have been seriously outdated for many years and were not or could not be brought into compliance with EPA regulations. Students come to a university expecting to receive instruction on the latest technology available, but they are not finding that. They are finding run down labs and out-dated equipment and technology.

If universities are to produce graduates in the sciences and engineering programs who can compete in the future economies, facilities must be renovated, updated or replaced which is why much of the increased construction activity is taking place on college and university campuses.

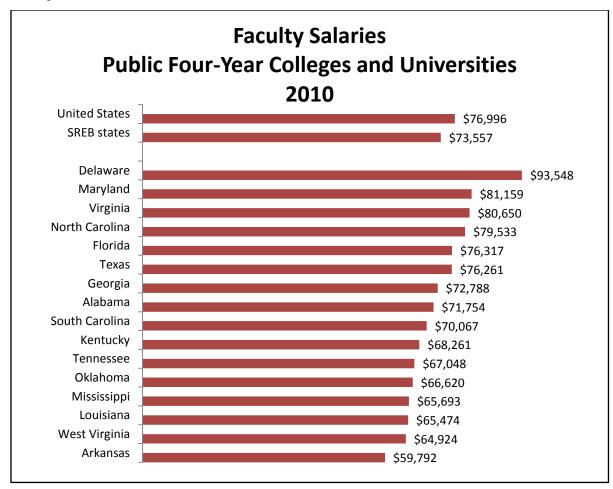

Not surprisingly, systems including electrical in the older facilities are not adequate to handle all the new computing equipment which was not even dreamed of when the buildings were designed. Computer equipment also places stress on out-dated air conditioning systems. Recent EPA regulations necessitate new plumbing for labs in the

sciences and engineering programs. Unless these renovations are carried out graduates will find their degrees have not prepared them for the careers they have chosen.

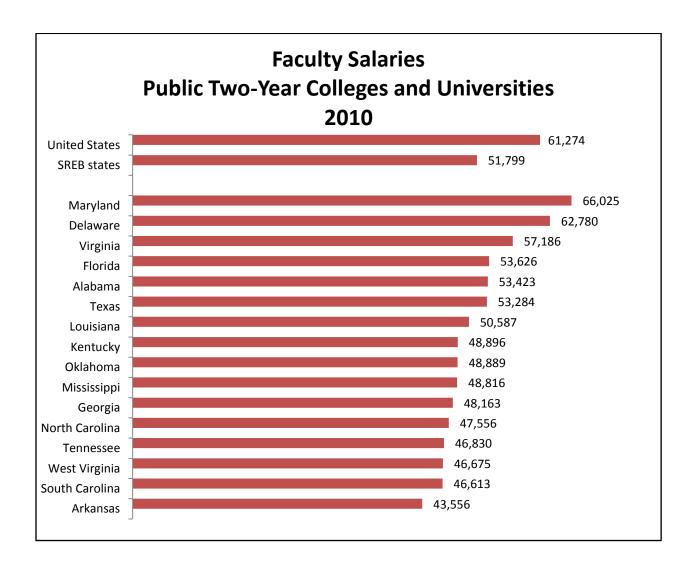

ADHE does not collect information about auxiliary facilities such as residence halls, athletic facilities, etc. A great deal of the construction seen on campuses is for auxiliary facilities. Old residence halls are passé. Thus, it is a matter of good business to provide the type of facilities that today's students are willing to occupy.

### **Arkansas Faculty Salaries**

The *SREB State Data Exchange* information published in June 2011 compares average faculty salaries in each of the SREB with the regional average and with the national average. The average university faculty member's salary in Arkansas was the lowest in the region. It was \$13,765 below the SREB average and \$17,204 below the national average.

Two-year college salaries were also the lowest in the SREB region. The average faculty salary in Arkansas for two-year colleges of \$43,556 was \$8,243 below the regional average and \$17,718 below the national average.

Even more disturbing is the comparison of two-year college faculty salaries with Arkansas average public school teachers' salaries. In Arkansas the average public school teacher's salary was \$3,144 higher than that of the two-year college faculty, who are required to have at least a master's degree and 18 graduate hours in their teaching field.

How is Arkansas to remain competitive in higher education with salaries so far below the regional and national average? The sad fact is that universities, on the average, pay master's degree prepared faculty less than the two-year colleges.

The dilemma of Arkansas Higher Education is how to provide a quality education when it is unable to entice faculty with the proper credentials because of low salaries. How does Arkansas increase the salaries of faculty in the economic environment facing the institutions of higher education in 2011-12?

## Why is Research Important?

Research, the pursuit of knowledge, is the life blood of a university. It is the key to economic development and new higher paying jobs in the state. New developing cutting-edge industries tend to locate near universities that are heavily involved in research related to their industry. Research is the basis for some of the most important parts of the upper level undergraduate and graduate level instruction. It provides graduates with cutting edge knowledge, problem-solving skills and familiarity with the latest technology

which prepares them to be leaders in their chosen field. Research results in a better life for all citizens of our state through the development of better medications, diagnostic equipment, methods of diagnosis and treatment.

Commitment to research is a necessity in attracting the best faculty to a university. Faculty members who are involved in research are also a necessity for quality doctoral programs. Doctoral candidates are required to do research for dissertations and the guidance for both research ideas and methodology can only be provided by faculty who are actively involved in research.

The Nano-technology research currently being conducted at several of Arkansas's doctoral institutions seems to have almost unlimited potential in numerous fields of human endeavor. This is particularly true in the developments in medicine.

Logistics research has allowed a number of Arkansas trucking firms to be leaders in the nation in their ability to deliver goods across America efficiently, economically and on time. The Arkansas Research and Education Optical Network (ARE-ON) is making the latest medical diagnosis and treatment capabilities available to rural hospitals and improving the health and longevity of those citizens who have not had access before without the expense of traveling a great distance. Research is truly improving the quality of life for Arkansans in terms of health care, better jobs, and a quality education.

It is incumbent on Land Grant institutions (UAF & UAPB) to have a commitment to research and to public service. Failure to be involved in both would result in the loss of significant federal funding. The research and public service functions of these Land Grant universities have resulted in our nation's farmers being the most productive in the world and our food supply exceeding our consumption. In addition, the food provided is the best and safest in the world.

Much of the research that has resulted in our major advancements have often started out as theoretical (basic) research, what some may have labeled "pie-in-the-sky," rather than applied research. This simply illustrates that the major thrust of research should not be

only on applied research – research with immediate practical outcomes or seeking solutions to existing problems.

In summary, Research improves the quality of life, attracts knowledge-based business and industry, improves economic development in the state, and creates better paying jobs in the state.

#### **Tuition and Fees**

Certainly, tuition and fee increases at colleges and universities, both public and private, have been under scrutiny in Arkansas and the nation. As pointed out, in our previous financial condition reports the two major factors responsible for tuition inflation were declining state support and tuition discounting in the form of institutional scholarships. Fortunately, increases in federal aid programs have helped to offset a greater portion of the student's costs.

Due to the downturn in the economy state funding for higher education has experienced major budget cuts over the past few years and no new money for the current biennium. With declining state support and increased enrollments, institutions have implemented several cost saving initiatives in order to help keep tuition and fees increases at a minimum. Even with these cost saving measures four-year institutions and two-year colleges found it necessary to increase tuition on average by 5.6 percent for fiscal year 2011-12.

The College Board reported that 2011-12 is the fifth straight year, tuition and fees at public colleges and universities rose at a higher rate than private, nonprofit institutions, an increase attributable in part to state funding for public schools that has not kept up with the growing number of student enrollments.

Nationally, in-state tuition and fees at four-year public colleges and universities increased 8.3 percent from the 2010-2011 academic year to 2011-2012, compared to a 4.5 percent increase at nonprofit, private four-year schools over the same period. This difference is reasonable based on the fact that state-supported institutions must raise tuition to meet

inflation. If inflation is 4 percent then institutions must raise tuition 8 percent to offset flat state support. In the most recent academic year, average in-state tuition at public schools was \$8,244, compared to \$28,500 at private schools. Total costs, including room and board, as well as tuition and fees, increased 6 percent for in-state public schools to \$17,131 per year. Total costs at nonprofit private schools increased 4.4 percent, to \$38,589. Tuition and fees at out-of-state, public four-year schools increased 5.7 percent this year to an average of \$20,770, while overall costs jumped 5.2 percent, to \$29,657.

Until 1997, there was a cap on the percent of undergraduate tuition and fee income that could be expended for academic and performance scholarships. After 1997, the competition for students merely increased the reliance on institutional scholarships to attract the best students and thereby influence funding. The increase in institutional scholarship offerings meant that the net income from tuition and fees receded further. This resulted in institutions having to increase tuition. Fortunately, AHECB directed the staff to seek amendments to the law which placed a cap on scholarship spending by institutions and in the 2009 legislative session that amendment became law. It is imperative that all students be charged full-tuition and any reduction be shown as a scholarship regardless of the student's status.

As the tuition and fees continue to rise, many students are finding relief in expanded federal aid, including tax credits, veterans benefits and a record expansion of the Pell Grant program for low-income students. For now, government subsidies and aid from schools are serving to hold down net tuition and fees - the actual cost students pay when grants and tax breaks are taken into consideration.

According to the College Board, students are estimated to have received tax credits and deductions for the 2009-2010 and 2010-2011 academic years of \$14.8 billion through the American Opportunity Tax Credit, implemented in 2009. That marks a dramatic uptick of more than 80 percent in inflation-adjusted dollars from the \$7 billion that students received in subsidies in the 2007-2008 academic year.

Over the same period, federal student loans and grant aid extended to the average student increased by about 30 percent in inflation-adjusted dollars, with grant aid continuing an annual increase while student loan borrowing dipped slightly in the most recent year. The U.S. Department of Education issued new rules that aim to help students with the repayment of their federal loans, including caps on monthly payment obligations and earlier eligibility for debt forgiveness.

### **Operating Margins**

Most of the operating margins of the institutions for 2010-11 showed improvement over the previous year. All institutions were higher than they were a decade earlier in 2000-01. Two graphs comparing 2000-01 operating margins to the 2010-11 margins are presented below. The more detailed historical operating margins by institutions are in Appendix A.

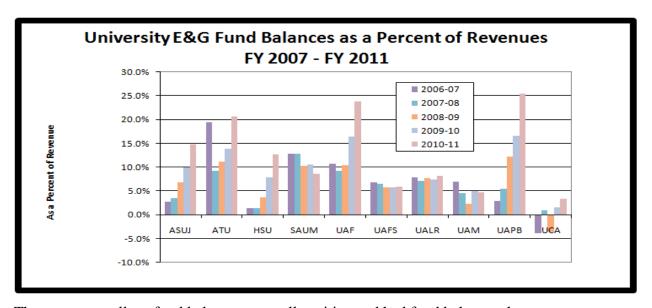

Often negative operating margins are the result of expending prior year fund balances to complete a serious deferred maintenance problem which is likely the case in most of the negative operating margins. The graph below contains the comparison of 2000-01 and 2010-11 operating margins of the two-year colleges. Of the 22 institutions nine had negative operating margins compared to six in the previous year.

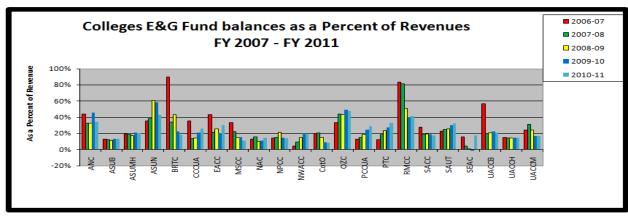

#### **Fund Balances**

Educational and General Fund balances are the perennial measure of the financial condition of institutions for higher education. For universities that minimum recommended level is 5 percent of the E&G operating budget with an ideal level of at least 14 percent. In 2010-11, only two of the universities were able to achieve that level and only one institution's fund balance was less than 5 percent. However, that can be misleading unless other fund balances are studied in detail along with these findings.

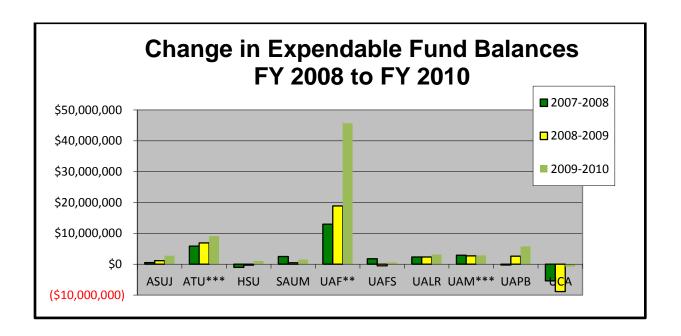

The two-year college fund balances were all positive and had fund balances that exceeded the 5 percent recommended for E&G. Although more than 80 percent of the two-year institutions fund balances were above the recommended 14 percent, this is not always adequate for the very small institutions. For those institutions with smaller budgets and enrollment, a better benchmark would be \$2.5 million in fund balance. The complete report of historical fund balances as a percent of revenue are in Appendix A.

### **Expendable Fund Balances**

Expendable fund balances are net of accounts receivable, inventories and encumbrances. They are primarily presented for a better understanding of the actual spendable portion of the reported fund balances. The graph below contains the expendable fund balance changes for universities from FY 2008 to FY 2010. No other historical data is available because this information was not collected prior to 2008.

\*Source Series: 11-1- In some instances the Fund Balance reported on the 11-1 will not equal the amount reported on the 17-4. Series 12-1 not available to update at time of release

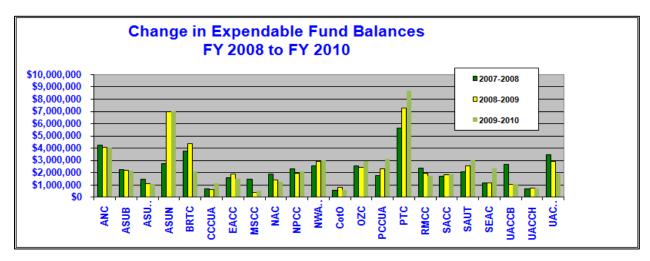

The changes present a positive picture with all institutions improving their spendable Educational and General Fund balances. Institutions with negative fund balances are walking a very fine line which is due in part to the economic recession that the country is experiencing.

The following graph contains the two year change in Educational and General Fund balances for the two-year colleges. Seven of the twenty-two, two-year colleges experienced a decline in their expendable fund balances from FY2009 to FY2010. All

<sup>\*\*</sup>Consolidated Fund Balance

<sup>\*\*\*</sup>Fund Balances reported on the 11-1 include the Technical Centers associated with these universities.

the two-year colleges had positive balances. However, some of those balances are getting - another sign of the economic down turn the nation has experienced.

Source Series: 11-1- In some instances the Fund Balance reported on the 11-1 will not equal the amount reported on the 17-4. Series 12-1 was not available to update at time of release.

Arkansas institutions have fared better than institutions in many other states and have continued to admit students as evidenced by the continued enrollment increase. More students and less funding are a recipe for declining fund balances which, given the current state of the fund balances, cannot be long endured.

### **Institutional Scholarship Expenditures**

The report for Institutional Scholarship Expenditures for 2010-11 indicates that the average university's expenditure for scholarships represented 11.7 percent of their total educational and general tuition and mandatory fee revenue. For 2010-11 the legislatively mandated cap on Academic and Performance Scholarships was 25 percent of tuition and fee revenue. All institutions reported scholarships below this mandated amount.

								Scholarships	Average	2010-11	Award

A.C.A.6-80-106 (b) establishes limitations on the maximum percent of unrestricted tuition and mandatory fee income that can be spent on academic and performance scholarships which is currently 30%. Academic and Performance scholarships awarded to students who received maximum Pell Grants were excluded for 2010-11 in accordance with A.C.A.6-80-106 (a)(2).

§A.C.A 6-80-106 establishes limitations on the maximum percent of unrestricted tuition and mandatory fee income that can be spent on academic and performance scholarships, which is currently 25 percent. If an institution exceeds this cap, there will be a reduction in the funding recommendation for the next fiscal year. Academic and Performance scholarships awarded to students who received maximum Pell Grants will be excluded in the calculation of the scholarship cap.

The chart below provides a five year history of the universities' scholarship expenditures for the purpose of observing trends in expenditures in light of the 2005 legislation placing a cap on such expenditures. Although there is a general downward trend from 17.2 percent of tuition and fees to 11.7 percent, some universities have actually increased their level of expenditures.

\*Academic and Performance scholarships awarded to students who received maximum Pell Grants were excluded for 2010-11 in accordance with Act 323 of 2009.

#### **Educational and General Facilities**

The 2010 Facilities Audit Program reported the replacement values for E&G facilities as \$4.6 billion. The auxiliary facilities would likely double that total.

The **deferred maintenance** need as of 2010 shows that the institutions have **\$2.1** billion in deferred maintenance with **\$111** million of that classified as critical. In July of 2008, the AHECB was shown photographs of the conditions of many of the laboratories at the colleges and universities. The conditions are shocking, especially in light of the fact that many students are coming from high schools with more modern and better equipped laboratories than they will find when they enter many of our colleges and universities.

If Arkansas's colleges and universities are to prepare students for the economy of the future, they must have *cutting-edge* laboratories and classroom equipment. Yet, students enter college and find that their high school offered better equipped labs and facilities than the college or university they selected. This is a matter of concern for institutions that are expected to be leading the way with the latest technology for the disciplines they offer.

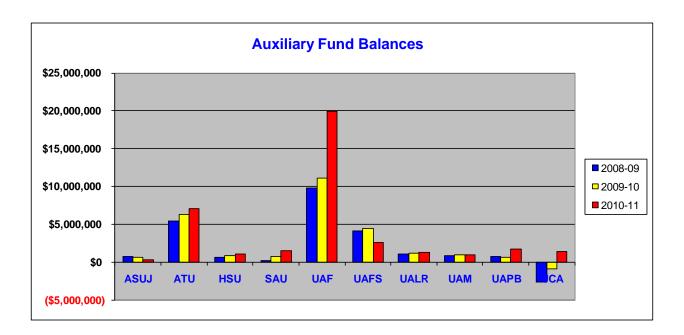

A university in Arkansas is still teaching chemistry in the same laboratory that they were teaching chemistry in 54 years ago with only the addition of a few newer fume hoods, not the latest technology, just newer than the 1950s edition. The equipment is reminiscent to what the new freshman's parents were exposed to in high school. In the area of health professions, areas where advances in technology are rapid, students are often taught on cast-off equipment from hospitals rather than *cutting-edge* equipment.

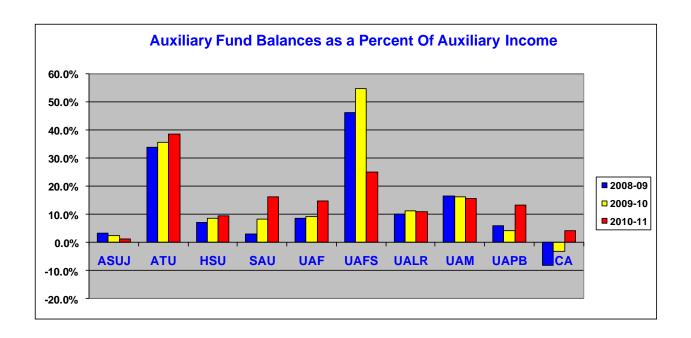

The quality of the graduates has not been compromised simply because of the ingenuity of faculty and staff who find ways to compensate for the problems of inadequate labs and equipment. The administration and faculty of the institutions deserve to be recognized for their efforts. If the desire is to produce more graduates in math, science and health professions, Arkansas must find funding for the equipment and facilities to support these

disciplines. If not, Arkansas will find it difficult to compete in the economy of the 21st Century.

#### **Auxiliaries**

Auxiliaries are primarily a matter of university concern since most two-year colleges have minimal auxiliary operations. Therefore, the only analyses of auxiliaries in this report deal with the auxiliary operations of universities. The following two graphs deal with the auxiliary fund balances. The first depicts the changing auxiliary fund balances over a three year period. The second represents the fund balances as a percent of auxiliary income. The auxiliary fund balances for 8 of the 10 institutions presented increased over the previous year.

Below is a series of spreadsheets that give the income and expenditures for institution by each type of auxiliary enterprise for 2010-11. The spreadsheets group the same category of institutions together for a better comparison of the profits and losses of each type of auxiliary enterprise.

From these spreadsheets it is obvious that bookstores are not "cash cows" as commonly believed. The difference you will notice in bookstores and food service are generally due to whether or not an institution has out-sourced/privatized its bookstore or food service operation. Modest income and very low expenditures usually indicate an institution that has out-sourced that operation. Losses in bookstore operations and food service are usually an indicator that the institution is operating its own bookstore and/or food service. As you can see in the graphs, another drain on Auxiliary funds is from the College Unions and Student Organizations & Publications.

#### **Athletics**

Athletics are a major component of the auxiliary operations at universities. Athletic expenditures at Arkansas's universities continue to cause a great deal of public consternation. The athletic report details revenues and expenditures for each institution. Athletic revenues will equal athletic expenditures unless there is an ending fund balance. Act 366 of 1991 (A.C.A. § 6-62-804) prohibits athletic deficits. A designated athletic fee must be charged to the students by the institution if athletic-generated revenues (i.e., ticket sales, media/tournament/bowl, concessions/program sales, and game guarantees), foundations/clubs and other private gifts, other athletic income, auxiliary profits, and the allowable educational and general transfer do not cover the total expenditures for athletics.

The 2010-11 total amount of athletic expenditures reported by state supported universities is \$123,790,930 and two-year colleges is \$430,848. The statewide total is \$124,221,778, an increase of \$7,428,431 (6%) from \$116,793,347 in 2009-10. The University of Arkansas - Fayetteville accounted for 95.0 percent of the increase.

A comparison of 2010-11 actual expenditures to 2010-11 budgeted revenues certified to the Coordinating Board in July 2011 is also illustrated at the bottom of the summary chart. Certified budgeted revenues for 2010-11 totaled \$111,352,063 for all institutions. Total actual expenditures for 2010-11 for all institutions exceeded this budgeted amount by 11.6 percent. Actual expenditures varied from the Board of Trustees certified budgeted revenue by a range of 18 percent over the budgeted amount to 7 percent under the budgeted amount.

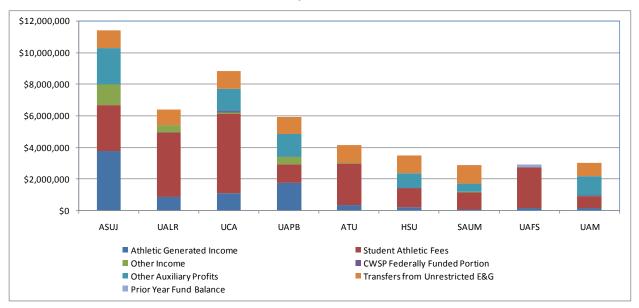

Needless to say, athletic expenditures since the 1990s have often grown faster than many institutions' overall budget. However, when athletics' expenditures and their interaction with educational and general income are examined together, a different perspective emerges. The importance of athletics to the educational and general budget becomes evident. Institutions would be much smaller without the student athletes and their friends from their high schools that come with them which would mean the loss of a rather significant portion of tuition and fee income. Regrettably, such an analysis is beyond the scope and time constraints of this report.

The following graphs examine reported athletic income and expenditures for all universities except the University of Arkansas at Fayetteville. The University of Arkansas data would distort the data so significantly that comparing and contrasting the other institutions would be impossible. The first two graphs look at athletic income by major sources. The first is by each source of reported income. It is obvious that athletics generate a relatively small part of the institutions athletic revenue. The institutions in general rely heavily on student athletic fees, other auxiliary profits and transfers from educational and general revenue to pay for athletics. There is some use of prior year fund balances by one of the institutions which raise a caution flag.

**Athletic Revenues by Source 2010-2011** 

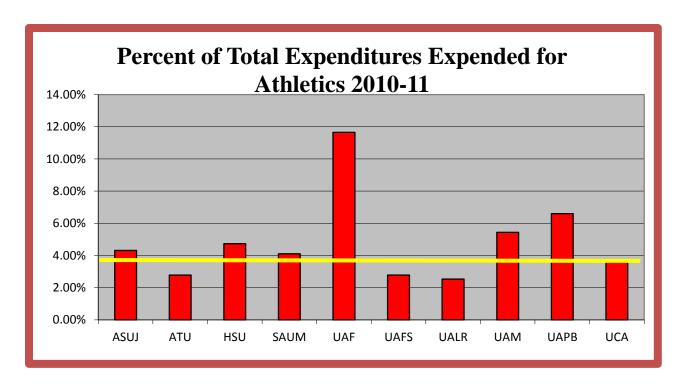

The next graph looks at the revenue sources as a percent of total revenue which gives another perspective of how dependent some institutions are on athletic fees, other auxiliary profits and E&G transfers to support their athletic program. The allowable athletic transfer from E&G revenue should be noted in this graph. The 2010-11 allowable transfer from E&G was about \$1.142 million regardless of the size of the institution or level of the athletic competition. For some institutions it is less than 10 percent of the revenue but for others it represents 30 to 40 percent of the revenue.

**Athletic Revenue by Source 2010-11** 

The following graph presents athletic expenditures as a percent of the total university expenditures. The heavy yellow horizontal line represents the average for the universities. The average athletic expenditure (excluding UAF) for 2010-11 represented only 3.77 percent of the total of the universities expenditures. This percent is down from 3.97 in 2009-2010. If athletics is an important part of the university experience, how much is it worth?

# Bonds and Loans Approved by AHECB 2007-2011

Institution	Date of AHECB Approval	Maximum Total of Issue	Terms	Project Description	Type of Project
ASU	Oct-07	\$10,000,000	25 yrs / 5.25%	E&G purposes on the campuses at Searcy, Mountain Home, and Newport.	E&G

NWACC	Jul-09	\$10,660,000	30 yrs / 5%	E&G purposes to purchase property adjacent to the main campus as an extension of education and general instructional space and offices.	E&G
UALR	Sep-09	\$34,750,000	20 yrs/ 5.5%	E&G purposes toacquire, construct, and equip a variety of capital improvements at UALR, including (i) completion of the Engineering and Information Technology Building, (ii) elevator upgrades; (iii) renovations to the Stella Boyle Smith Concert Hall, (iv) construction of a Nanotechnology Sciences Center, (v) construction of a Student Services One-Stop Center, (vi) renovation of an existing building for Health and Wellness Academic Programs.	

UALR	Oct-09	\$30,000,000	25 yrs/ 4.5%	Auxiliary purposes to construct and equip a housing complex and construct a student recreation and sports complex.	Auxiliary
SAU	Oct-09	\$10,310,000	30 yrs/ 4.85%	Auxiliary purposes to refund the 1999, 2001 and 2003 auxiliary issues, auxiliary conctruction purposes and other various capital improvements.	Auxiliary
OZC	Oct-09	\$3,600,000	30 yrs/ 4.8%	E&G purposes to refund a previous bond issue and construct an educational facility at the Mtn. View location.	E&G
UAF	Dec-09	\$54,000,000	30 yrs/ 5.5%	Auxiliary and E&G purposes to fund E&G renovation projects in Peabody Hall for the College of Education and Helath Professions, Phase I of classrooms and teaching laboratories, Old Health Center for Nursing and the Speech and Communication Disorders Clinic, Bud Walton Hall for the David and Barbara Pryor Center for Arkansas Oral and Visual History and the Center for Space and Planetary Sciences, Davis Hall for University Relations (\$4 million), and Utility Tunnel Expansion; to construct the Nanoscale Science and Engineering Building; and to purchase property and various equipment. The proceeds will also be used to fund auxiliary renovation projects in various residence halls and one fraternity.	Auxiliary
UACCB	Jan-10	\$1,000,000	10 yrs/ 0.45%	CSRB Loan used in conjunction with higher education bond funds to construct a Nursing and Allied Health Facility.	E&G
ASUB	Jan-10	\$11,950,000	30 yrs/ 4.75%	Auxiliary purposes to construct and furnish a 248-bed student housing complex.	Auxiliary
ATU	Apr-10	\$1,730,000	30 yrs/ 5.25%	E&G and auxiliary purposes. E&G purposes to fund 33 percent of the cost to renovate an existing student services center for the purpose of creating a student union that will include library and computer lab facilities for academic use and auxiliary purposes to fund 67 percent of the cost to renovate an existing student services center for the purpose of creating a student union that will expand the bookstore and add food service operations.	E&G/Auxiliary
UCA	Apr-10	\$6,000,000	Repaid no later than 10-28-11/ 4.96%	E&G loan/line-of-credit for current operations purposes	E&G
MSCC	Jul-10	\$5,180,000	30 yrs/ 5%	E&G purposes to construct a Bio-Diesel Technology Building and surrounding infrastructure.	E&G
UCA	Jul-10	\$42,000,000	30 yrs/ 5.25%	E&G and auxiliary purposes. E&G purposes to refund certain existing bonds and fund a pro-rata share of the cost of the total issuance and auxiliary purposes to refund certain existing bonds and fund a pro-rata share of the cost of the total issuance.	E&G/Auxiliary
UACCM	Jul-10 Jul-10	\$15,000,000 \$800,000	25 yrs/ 6.6% 10 yrs/ .38%	E&G purposes to construct a Health Professions Building.  CSRB Loan for ADA and safety issues as well as infrastructure improvements.	E&G E&G
HSU	Oct-10	\$2,750,000	30 yrs/ 7%	CSRB Loan proceeds combined with \$2,500,000 from a private source for the purpose of constructing a new dining facility on campus.	Auxiliary
EACC	Oct-10	\$3,500,000	30 yrs/ 4.85%	E&G purposes to retire existing debt, purchase facilities to house the Transportation Programs, and construct an Allied Health facility.	E&G
CCCUA	Oct-10	\$300,000	20 yrs/ 5.25%	E&G purposes to purchase and renovate a building in order to offer classes at Murfreesboro.	E&G
UAFS UAMS	Nov-10 Nov-10	\$9,300,000	25 yrs/ 4.5%	E&G purposes to renovate the Boreham Library.  Auxiliary purposes for (a) improving, equipping and furnishing the ninth floor of	E&G Auxiliary
		\$12,000,000	yrs/ 3%	the new patient tower building, which will add 60 acute care beds and is expected to generate approximately \$1.2 million annually in net margin to UAMS; (b) improving, equipping and furnishing the eighth floor of the Winthrop P. Rockefeller Cancer Institute; (c) equipping a Central Energy Plant expansion and upgrade which will save energy consumption and reduce cost by approximately \$3.5 million; (d) acquiring undeveloped land for expansion and other University related purposes including Ray Winder Field, and any necessary demolition and site preparation; (e) remodeling operating rooms and adding recovery rooms in the surgical suite to increase surgical capacity; and (f) acquiring, improving, renovating, equipping and/or furnishing other capital improvements and infrastructure and acquiring various equipment. The \$12 CSRB Loan also for auxiliary purposes to fund a portion of the Central Energy Plant.	
отс	Feb-11	\$565,000	15 yrs/ .37%	CSRB Loan for educational and general purposes to remodel and expand the Cosmetology Building.	Auxiliary
PTC	Feb-11	\$45,000,000	30 yrs/ 4.70%	E&G purposes to construct and equip a 100,000 square feet Fine and Performing Arts/Humanities Center and a 30,000 square feet Culinary Arts and Hospitality Management Center.	E&G
SAUM	Feb-11		30 yrs/ 4.75% & 10 yrs/ 0.00%	E&G purposes for construction of a new Agricultural Center and to update current academic and administrative facilities relating to agricultural and farm operations. The E&G portion of the loan will be for a district heating and cooling upgrade to the campus infrastructure. The auxiliary portion of the loan will be for the replacement of windows in Bussey Hall with energy efficient windows.	E&G
ATU	Feb-11	\$2,500,000	30 yrs/ 5.25%	Auxiliary purposes to renovate and equip Tucker Hall as a residence hall for	E&G/Auxiliary
UAF	Apr-11	\$135,250,000	30 yrs/ 5.75% & 10 yrs/ 4.00%	students.  E&G purposes to fund renovation and addition projects in Vol Walker Hall and Ozark Hall; demolition and construction of a new Hillside Auditorium; Phase II of modernization of classrooms and teaching laboratories; renovation of Science Building; construction of Child Development Study Center, and Hazardous Waste Facility; renovation of Arkansas Union space; expansion of Utility Infrastructure capacity; and additional facility funds as required for the projects or bond structure. First series of auxiliary purposes to construct a new Football Center & the second series to fund auxiliary renovation projects in various residence halls including; Yocum Hall, Pomfret Hall, Futrall Hall, Humphries Hall and Wilson Sharp/Darby/Walton Hall; renovation and addition to one fraternity; and to expand a student dining hall.	E&G/Auxiliary
UALR	Jun-11	\$2,000,000	10 yrs/ 0.00%	E&G purposes for campus-wide lighting retrofit, expansion of a satellite chilled water plant distribution loop, and upgrade of HVAC control valves in the Center of Performing Arts.	
ATU	Jul-11	\$12,505,000	30 yrs/ 5.25%	Auxiliary purposes to construct a new five-story 64,170 square foot residence hall.	
PTC	Sep-11	\$71,000,000	30 yrs/ 4.65%	E&G purposes to refund approximately \$26million in existing debt & to construct and equip a 100,000 square foot Fine and Performing Arts/Humanities Center and a 30,000 square foot Culinary Arts and Hospitality Management Center.	
UACCH	Oct-11	\$1,100,000	10 yrs/ .20%	E&G purposes for the construction of an Instruction Services Center at Texarkana, Arkansas.	
UAFS	Oct-11	\$2,200,000	10 yrs/ 0.00%	E&G purposes of the loan will be used to fund infrastructure upgrades an the UAFS campus, including the creation of a central energy plant to provide district cooling and district heating to various campus facilities and a campus lighting extensit.	
UCA	Oct-11	\$15,500,000	30 yrs/ 5.50%	lighting retrofit.  Auxiliary purposes for the expansion of the Health, Physical Education, and Recreation Center (HPER).	

#### **RECOMMENDATIONS FOR 2011-2012**

- During the recent budget hearings Legislators were concerned with the tuition rates charged to concurrently or dually enrolled students. Although a policy exists in the academic policy, a stand-alone policy should be adopted for Institutional Finance.
- A great inequity exists in the funding per FTE student among Arkansas's two-year colleges. These inequities are not the fault of the colleges but are a result of rapidly increasing enrollment at some colleges and declining or stable enrollments at others. Since the funding formula is in law, it is not advisable to adopt an AHECB policy which is in conflict with the law. It is recommended that the ADHE Director, the Institutional Finance staff and the two-year presidents and chancellors work together to bring all institutions to seventy-five percent of need with priority given to the institutions with the lowest funding.
- It is recommended that bonds or loans approved by the AHECB for Auxiliary purposes not exceed twenty-five years.
- AHECB must continue to work on the new measures for performance funding and the development of a methodology for the distribution of the performance funding pool.
