 SFY2019 Drinking Water Project Priority List 30

 Appendix B - EPA Assurances 39

I. Introduction

A. Arkansas' Drinking Water State Revolving Loan Fund

This is the State of Arkansas' (State) Intended Use Plan (IUP), prepared jointly by the Water Resources Development Division (Water Division) of the Arkansas Natural Resources Commission (ANRC) and the Arkansas Department of Health Engineering Section (ADHE) which identifies intended uses of the funds available to Arkansas as authorized by the Safe Drinking Water Act (SDWA), as amended in 1996 (42 U.S.C. § 300j-12 et. Seq.).

In Arkansas, the overall program is named the Safe Drinking Water Fund (SDWF). The SDWF is made up of two programs which are the Drinking Water State Revolving Fund (DWSRF) program and the State Set-Aside Fund (SSAF) program. The Water Division, through an interagency Agreement with ADHE (the Primacy Agency in Arkansas), administers the DWSRF. Through the DWSRF program, the Water Division will use funds for water projects that further the goals of the Safe Drinking Water Act. With the exception of the Administration Funds for the DWSRF program, which go to and are administered by the Water Division, the ADHE administers all facets of the SSAF. The SSAF Program will use the funds to provide Small Systems Technical Assistance, State Program Management, Local Assistance and Administration Funds. It is the intent of SDWF to consistently comply with all requirements as stipulated in each year's grant agreement for the capitalization grant. However, procedural changes and reporting requirements may be modified by EPA. These changes will be incorporated into the State's program, as necessary.

As required by the SDWA, the State is required to prepare this annual Intended Use Plan (IUP) in order to identify the set-aside programs and projects that will utilize the funds available to the SDWF. This IUP is prepared for State Fiscal Year 2019 (SFY 2019) and identifies those sources and uses of available program funds. For the purpose of this IUP, the fiscal year identified is the State Fiscal Year 2019, beginning July 1, 2018 and ending June 30, 2019. The capitalization grants and the state match to fund these activities are from prior fiscal years and the Federal Fiscal Year 2018 (FFY 2018) appropriation. This IUP is prepared prior to the end of the previous state fiscal year (SFY2018), as a result, the SFY2018 data will be as of March 31, 2018.

B. Public Notice

To ensure that the public has an opportunity to review the State's proposed plans for the DWSRF, a draft IUP was published on the ANRC website (<http://www.anrc.arkansas.gov/divisions/water-resources-development>), to accept comments on the Intended Use Plan. To ensure that interested parties were made aware of the draft IUP and the comment period, ANRC posted notice on the ANRC web-site and published a public notice advertisement for the Drinking Water Intended Use Plan in the Arkansas Democrat-Gazette, a statewide paper, on Sunday, July 1st and Sunday, July 8th, 2018. The public comment period remained open with a deadline for submittal of written comments of July 30, 2018. Copies of the Intended Use Plan were also available, upon request, at the Water Resources Development Division of the Arkansas Natural Resources Commission. Arkansas received no comments on the SFY 2019 IUP.

II. Projects and Available Assistance

This IUP contains a list of projects the State anticipates to fund and information on how the State plans to use:

- a) The set aside funds carried over from previous State Fiscal Year (s), which includes set-asides from the 2016 and 2017 capitalization grants along with the estimated 2018 capitalization grant.
- b) The remainder of the 2016 capitalization grant in the amount of \$9,504,1212, the 2017 capitalization grant in the amount of \$12,363,598 (balances as of 3/31/18), and the 2018 capitalization grant in the amount of \$16,711,000 .
- c) The funds the State receives from the repayment of loans previously made from the Drinking Water State Revolving Fund (DWSRF) Program.

The DWSRF program expects to disburse approximately \$10 million to projects in this fiscal year. These projects are all designed to meet one or more of the goals of the SDWA which are

- a) Help ensure public health protection
- b) Comply with the SDWA
- c) Ensure affordable drinking water.

III. Goal Statements

The Arkansas Drinking Water Program is an integrated and centralized program funded by the DWSRF, Public Water System Supervision and state funding. The primary focus of the program is to achieve public health protection and rule compliance. All mandatory and voluntary program elements, (i.e. technical assistance, capacity development, source protection, rule implementation, enforcement, etc.) are coordinated to assure this end.

A. Short-term Goals

1. Arkansas anticipates entering into nine (9) binding commitments for a total of \$25,678,100. The projects are identified in [Chart 4](#)
2. Arkansas anticipates at least one (1) project that includes components that meet green project reserve requirements, identified in [Chart 5](#). However, additional projects are likely to have green components.
3. Arkansas anticipates five (5) projects that will meet the add sub requirements and three (3) projects that will receive Disadvantaged Funds in the form of principal forgiveness. The projects are identified in [Chart 5](#).
4. Complete set-aside work plans specifying funds from the capitalization grant. (Target Completion: Within 60 days of grant award)
5. Arkansas ADHE will continue to utilizing the State Program Management set-aside to a portion of the implementation of the State Public Water Supply Supervision Program plan effort. This will include activities in this fiscal year such as: review and approval of 200 (goal) plans and specifications, logging and tracking of 1400 (goal) plan submissions, 250 (goal) sanitary surveys, technical assistance to Public Water System Supervision in a variety of ways, and other implementation activities.
6. Arkansas will continue to screen projects using the Project Priority System to assure the Safe Drinking Water Acts overall goals are given priority in the DWSRF program. The Goal for this fiscal year is to have at least 30 projects on the Project Priority List.
7. The Division will apply for the federal cap grant funds in the first year that they are appropriated.
8. Arkansas will continue to implement the State capacity development program strategy at no cost to entities. A vital element of this program is the technical assistance contracts provided under the Small System Technical Assistance and/or Local Assistance Set-aside. These were restructured slightly to focus more on direct assistance to the systems. SFY 2019 goals for these contracts are 1,500 hours of technical assistance including AWOP activities.
9. The program is considering a contract with Northbridge to help with marketing and streamlining the processes for both CWRLF and DWSRF.

B. Long-term Goals

Arkansas has committed to continually work towards these goals.

1. Maintain the fiscal integrity of the DWSRF and assure a continuous enhancement of the loan fund for future generations.
2. Maintain the fund in perpetuity by protecting the principal that has been and continues to be deposited into the DWSRF program.
3. Provide entities with a source of long-term, low-interest financing that will allow them to protect their customers' health and comply with the Safe Drinking Water Act.
4. The Division will meet the growing demand for the DWSRF program by leveraging the fund when the demand exceeds the current revenue streams.
5. Arkansas will continue to implement the Public Water System Supervision Program in conformance with its primacy commitments.
6. Arkansas will continue to implement the State Source Water Assessment/Protection Program.
7. Arkansas will continue to implement the State Capacity Development Program strategy.
8. The Division will maximize the number of entities meeting the SDWA requirements by combining the DWSRF program with other state and federal funding programs. SEE email on Cap of these 2
9. Arkansas will make every effort to expend funds within two (2) years of cap grant award, continuing to expend all funds in an expeditious and timely manner

C. Environmental Results under EPA Assistance Agreement Goals

The Division's DWSRF program will satisfy EPA's Strategic Goal 2 for Clean and Safe Water, Objective 2.1 for Protecting Human Health, Sub objective 2.1.1 for water safe to drink by relating the activities of the Program to quantifiable environmental results. The following short term goals are presented in order to be in compliance with EPA Order #5700.7, which became effective on January 1, 2005.

The outputs below will be used as a measure to comply with the new requirements:

Output 1 – Provide nine (9) loans to water systems. The projects are identified in [Chart 4](#).

Output 2 – Enter into binding commitments with seven (7) small systems and two (2) large systems during this fiscal year. The projects are identified in [Chart 4](#).

Output 3 – Arkansas Department of Health also contracts to work with small systems. Goals for these contracts include 2 eight-hour training courses, 24 one-hour group training sessions and three CPEs.

Environmental benefits will result from loans made and projects completed to reduce specific contaminants, create energy savings, conserve water, increase capacity to meet current water needs, replace aging infrastructure, and comply with state and federal regulations.

IV. Distribution of Funds

A. Distribution of Funds between DWSRF Program and SSAF Programs

Arkansas puts a priority on providing existing Public Water Systems with technical assistance to insure all Public Water Systems meet the requirements of the Safe Drinking Water Act. Arkansas endeavors to provide these services at no cost to the systems. To meet this goal, Arkansas allocates available funds to the State Set-Aside Fund programs. There are federal restrictions on the amount of funds that can be allocated to these programs from the capitalization grants. Arkansas will allocate 8.2% of grant funds to State Program Management (reserving 1.8 % for future use), 0% to Small System Technical Assistance (reserving 2% for future use), 5.0% to Source Water/Wellhead Protection Activity and 10% to Technical and Financial Assistance to Public Water Systems for Capacity Development this year. The ADHE will be responsible for the management and reporting needed for all of these State Set-Aside Fund programs.

The administration of the DWSRF program also falls in the category of State Set-Aside Fund programs. The Division plans to use the full 4% allowed for administration. The Water Division will be responsible for the administration and reporting needed for the DWSRF program.

B. Distribution to Specific Projects in the DWSRF Program

Arkansas' method for the development of the Priority List and Fundable List explains the process used to select systems to receive assistance.

1. Priority System

The ADHE is responsible for developing the Priority System. They have developed a system that includes factors for projects that:

- a) address the most serious risk to human health,
- b) are necessary to ensure compliance with the requirements of the SDWA, and
- c) assist systems most in need on a per household basis according to state affordability criteria.

The Priority System Questionnaire is sent to each Public Water System (PWS) in the state each year. The questionnaire describes the Priority System used by the DWSRF program and lists the point values assigned to each category in the Priority System. The ADHE sends the questionnaire to the PWS so they can add new projects to the Priority List. The ADHE

evaluates the questionnaires that are returned and assigns point values to the various categories, included as [Appendix A](#). A project's total points are used to determine the project's ranking. The more points that a project receives, the higher it is placed on the priority list. The new projects are added to the projects which were not funded from the previous Priority List, and a new Priority List is assembled.

To be placed on the Priority List an entity must submit a questionnaire to ADH. Since submitting the questionnaire is a voluntary task, only projects that expect to be funded by the DWSRF program are listed on the Priority List. Once the ADHE prepares the Priority List, it is the Water Division's responsibility to create a Fundable List from the Priority List.

2. Priority List of Projects

The Priority List contains projects that are interested in utilizing funding from the DWSRF program. Each project is evaluated to determine its' relative priority as compared to the rest of the projects seeking funding through the DWSRF program. The ADHE prepares the Priority System used to rank projects, included as [Appendix A](#), sends out the questionnaires, determines the priority points for the projects that return questionnaires and develops the [Priority List](#). The Water Division then takes the Priority List and establishes a Fundable List. The Fundable List ([Chart 4](#)) is not a separate list, but is instead composed of projects from the Priority List that expect to close and expend funds in this fiscal year.

40 CFR 35.3555(d) states that the Priority Lists of projects may be amended during the year under provisions established in the IUP as long as additions or other substantive changes to the lists, except projects funded on an emergency basis, go through a public review process first. The public review process will include placing it on Arkansas Natural Resources Commission's website.

Drinking Water State Revolving Fund projects that are qualified (in whole or in part) for Green Project Reserve will be ranked on the same state priority list with non-Green Project Reserve projects, and will be identified as Green Project Reserve projects on the fundable list. Once ranked they will be selected separately from non-Green Project Reserve projects, using the same priority system principles described above, until the total value of executed assistance agreements in qualified Green Project Reserves projects totals an amount equal to capitalization grant requirements, see [Chart 5](#).

3. Fundable List of Projects

As stated in 40 CFR 35.3555I (2) (i) s, the IUP must contain a fundable list of projects that are expected to receive assistance from available funds designated for use in the current IUP. The Water Division defines "receive assistance" to mean closing a loan and expending funds. Projects that are ready to proceed are added to the Fundable Project Priority List and bypass those projects that are not on schedule. It is Arkansas' intent to offer funding to all of the projects listed on the Priority List. The Fundable List simply shows those projects that expect to receive assistance from the Drinking Water State Revolving Fund in this fiscal year ([Chart 4](#)).

a) Ready to Proceed

"Ready to proceed" means a project that has been approved by Arkansas Natural Resources Commission. Projects that have met this requirement are moved to the fundable portion of the Project Priority List and bypass those projects that are not on schedule.

b) Binding Commitments

The Division has defined the Binding Commitment date as the date the Bond Purchase Agreement (BPA) is signed by all parties. Loan Closing and Binding Commitment typically occurs six months to one year after approval of the Arkansas Natural Resources Commission. It is anticipated that DWSRF will enter into nine (9) binding commitments for \$25,678,100 during SFY 2019. Seven (7) of these projects are anticipated to be for small systems in the amount of \$10,060,000. The funding for small systems on the SFY 2019 fundable list is equal to thirty-nine percent (39%) of the total cost of projects on the fundable list. This amount exceeds the requirement that at least 15 percent (15%) of loan funds be utilized for small systems.

4. Bypass Procedures

Arkansas' intention is to fund every project on the Priority List as it becomes ready to proceed. With the exception of an emergency public health project, the state does not plan to bypass a project that is ready to proceed for another project with a lower ranking.

If a project's readiness to proceed changes status after it was placed on the Fundable List, the State reserves the right to put the project on hold and take another project from the Priority List that is ready to proceed in its place. Previous examples of this kind of problem include court cases being filed, other funding being withdrawn, or change in administration of the entity proposing the project. If a project is not ready to proceed, the Water Division will substitute the next project on the priority list that is ready to proceed.

If a situation develops which causes the State to bypass a project that is ready to proceed for another project, the State will report the situation to EPA and include an explanation in the Annual Report.

5. Emergency Public Health Projects

Arkansas reserves the right to fund projects not on the Priority List if these projects protect the public from an imminent health threat. The ADH is the sole entity in Arkansas that can declare a situation to be an imminent health threat. The Director or his designee would make the determination of an imminent health threat based on an immediate risk to the public health caused by a situation that is amenable to correction. The project developed to correct the situation would still have to meet eligible qualifications for funding from the DWSRF program. This procedure would allow a project designated as an imminent health threat to bypass the Priority List and Fundable List phases of the DWSRF program only.

Arkansas would notify the EPA in the event that a project was designated as an imminent health threat. This project would be reported in the Annual Report.

C. Type and Terms of Assistance

Prior to FFY 2010, the Division made the decision to provide one type of assistance - loans. Loans provide the most flexible use of the funds in the DWSRF program. The use of other types of assistance, Insurance or Guarantees, causes those funds to be unavailable and their uses restricted. By providing assistance in the form of loans, the Division can vary the terms of the loans to help Disadvantaged Communities, refinance existing debt to improve the finances of entities or pledge the loans to Leverage Issues which would increase the funds available for the DWSRF program. Beginning with the 2009 American Recovery and Reinvestment Act and the FFY 2010 Capitalization Grant, the Division may offer additional subsidization in the form of principal forgiveness, negative interest rate loans, or grants.

The type of assistance to be provided will be loans for up to one hundred percent (100%) of the eligible cost of drinking water projects. Loans at below market interest rates provide affordable financing and incentives for loan applicants to meet the program requirements. The program provides for flexibility and the perpetuity of the DWSRF.

1. Lending Rate

The lending rate is composed of two parts: the interest rate and the servicing fee. The lending rate will be determined at the time the borrower is developing the Bond Purchase Agreement and the Bond Ordinance. The lending rate is determined using a formula that starts with a published list of daily market interest rates for a series of maturity dates for General Obligation Bonds. Those rates are modified to take into account the fact that the Drinking Water State Revolving Fund is a Revenue Bond program and then the series is converted to an average weighted value. That single rate is then multiplied by 80% to get the Lending Rate.

Standard Lending Rates (effective 1/1/2015):

- 1.5% for a ten (10) year repayment period
- 2.50% for a twenty (20) year repayment period
- 3.0% for a thirty (30) year repayment period.

Special Lending Rates:

- Meter replacement projects to improve water conservation
0% interest and no less than 1/2% fee for a lending rate of no less than 1/2% for a maximum of 10 years.
- Water Storage project to meet industry standards
0% interest and 1/2% fee for a lending rate of 1/2% for a maximum of 10 years
- Energy Efficiency projects:

0% interest and 1/2% fee for a lending rate of 1/2% for a maximum of 10 years
0% interest and 1% fee for a lending rate of 1% for a maximum of 20 years
1/2% interest and 1% fee for a lending rate of 1.50% for a maximum of 30 years

- Projects with American Iron & Steel and/or Davis Bacon Impacts
0% interest and 1/2% fee for a lending rate of 1/2% for a maximum of 10 years
0% interest and 1% fee for a lending rate of 1% for a maximum of 20 years
1/2% interest and 1% fee for a lending rate of 1.50% for a maximum of 30 years

The Division varies the lending rate in this manner to encourage entities to repay loans as quickly as possible. The quicker that entities repay the sooner the DWSRF program will be able to use these funds on future projects.

The servicing fee is currently set at 1.0%. Therefore, if the lending rate is 3.5%, it is composed of a 1.0% servicing fee and a 2.5% interest rate. The servicing fee is the same for all projects, so changes in the interest rate mirror changes in the lending rate.

The service fees are deposited into the Fees and Administrative account which is outside of the DWSRF and not subject to the four percent administration cap applicable to the DWSRF.

2. Repayment Period

The repayment period is adjusted to provide disadvantaged communities with an incentive to use the DWSRF program. An approved applicant's maximum loan term is 20 years. However, if an entity qualifies as a disadvantaged community the option to extend the term (repayment period) up to 30 years based on the life of the project is available. In no case will the extended loan term exceed the estimated life of the project.

D. Fees Assessed on Entities

The servicing fee of 1% is collected as part of the semi-annual loan repayment. These funds are placed in the DWSRF Administration Account and are used to fund eligible program expenses.

E. Green Project Reserve (GPR)

The Green Project Reserve mandate was removed in the FFY 2012 appropriation and the DWSRF program is no longer required to meet the 20% requirement on each cap grant. The Division will continue to solicit for "Green" projects from Public Water Systems (PWS). The program has met the "Green" requirement for the FFY2010 & 2011 Cap Grants. This data has been reported in EPA's Drinking Water Project Benefits Reporting database (PBR).

To be eligible for GPR funding, the applicant must be a public water system and the project must demonstrate that it will facilitate compliance with national primary drinking water regulations or otherwise significantly further the public health protection objectives of the SDWA. Projects eligible for Green Project Reserve will be in one of the following categories:

- Energy Efficiency
- Water Efficiency
- Green Infrastructure
- Environmentally Innovative

F. Additional Subsidization

The Division has developed the following system to determine if a project is eligible for additional subsidization funds for the Drinking Water Revolving Loan Fund. Arkansas provides additional subsidization in the form of principal forgiveness. See [Chart 5](#) for additional subsidization projects on the SFY2019 fundable project list.

To be eligible to receive additional subsidization from the fund, a borrower must show either:

- 1) The current utility rates or proposed utility rates for 4,000 gallons of water on an annual basis are at least 1.5% of the Median Household Income (MHI) for the project area.
- 2) At least 51% of the customers who benefit from the project have either low or moderate income as defined by the U.S. Department of Housing and Urban Developments' Community Block Grant (CDBG) Program; and have 1.25% of Median Household Income.

Once a project has been determined to be eligible for additional subsidization from the DWSRF, additional priority will be given to projects that meet the green standards set by ANRC. ANRC has allocated a total of \$36.3 million for projects or project components eligible for additional subsidization, of which approximately \$26.5 million had a closing date on or before March 31, 2018, leaving approximately \$9.8 million in additional subsidization available for allocation, including the estimated 2018 cap grant additional subsidization of \$3,342,200 and disadvantaged community of \$5,013,300. See [Chart 5](#) for the additional subsidization estimated for projects expected to close in SFY2019.

| Drinking Water | | | | | | | | | | |

| | | Totals: | | 29,507,010 | 15,991,200 | * 34,837,410 | 36,383,187 | (2,766,898) | * 12,612,000 | * 9,845,102 |
| | | | | | | Total Max Add Sub + Max Disadvantaged Allowed: | 46,228,289 | * Binding Commitments required within 12 Months of Fund Availability | | |

G. Disadvantaged Community Assistance

Arkansas will provide some incentive for disadvantaged communities to use the DWSRF program. Because of the limited funds the DWSRF program receives, that assistance is limited to offering additional subsidization (principal forgiveness) or extending the maximum repayment period for loans from 20 years to 30 years. See [Chart 5](#) for the disadvantaged community assistance estimated for projects expected to close in SFY2019.

| Cap Grant | Maximum Disadvantaged Community Assistance Available in SFY2019 |
|-----------------|---|
| 2016 | 3,815,700 |
| 2017 | 3,783,000 |
| 2018 (estimate) | 5,013,300 |

* Binding Commitments required within 12 Months of Fund Availability for Principal forgiveness

1. Disadvantaged Community

In Arkansas, a disadvantaged community has been defined as any community:

- With a Median Household Income (MHI) below that of the State's MHI. Arkansas' MHI is the average of the most recent three (3) years of available data on the ACS 5-year estimates provided by UALR. Arkansas' MHI for SFY2019 is \$41,657; or
- At least a 5% change in population, for communities of 25,000 or less, compared to the population trends for 1990, 2000 and 2010 census data. The change in population figure will be determined by multiplying the average of the population trends for 1990, 2000 and 2010 by 1.05 and compared to the 2010 population (*Data Source: U.S. Bureau*

of the Census: 2010 Census Redistricting Data (Public Law 94-171) Summary File, 2000 Census Redistricting Data (Public Law 94-171) Summary File); or

- If the Unemployment figures (average of last three 5-year ACS numbers) are 250% higher than the State's unemployment figures.

1. Affordability Criteria

The Division will offer two types of assistance to disadvantaged communities: an extension of the repayment period and additional subsidization. One of the criteria used is a comparison of the entity's MHI against the State's MHI.

2. Identification of Projects

The [Project Priority List](#) and [Chart 5](#) include a column defining which projects will qualify as disadvantaged communities.

H. Wage Rate Requirements (Davis-Bacon)

Starting in FFY2013 and thereafter, Davis-Bacon wage requirements now applies to construction of all projects carried out in whole or in part with assistance made available by a DWSRF program. Arkansas agrees to include in all agreements to provide assistance for any construction project carried out in whole or in part with such assistance made available by a drinking water revolving loan fund as authorized by section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j-12), a term and condition requiring compliance with the requirements of section 1450(e) of the Safe Drinking Water Act (42 5 U.S.C.300j-9(e)) in all procurement contracts and sub-grants, and require that loan recipients, procurement contractors and sub-grantees include such a term and condition in subcontracts and other lower tiered transactions. All contracts and subcontracts for any construction project carried out in whole or in part with assistance made available as stated herein shall insert in full in any contract in excess of \$2,000 the contract clauses. This term and condition applies to all assistance agreements under the authorities referenced herein, whether in the form of a loan, bond purchase, grant, or any other vehicle used to provide financing for a project. ANRC will continue to update this term and condition as updated procedures are provided with subsequent cap grants.

VI. Financial Planning Process

Arkansas Natural Resources Commission manages three State programs and two additional federal programs to meet the drinking water needs in the State. These programs can also fund the projects eligible for DWSRF funding. The financial planning process used for the DWSRF program considers all of these sources of funding and each one's strengths and weaknesses.

Arkansas also has an organization called the Water/Wastewater Advisory Committee that reviews all water and wastewater projects before the project applies to a funding program. This process allows the Water Division to have some idea of future projects and who they are likely to apply to for funding. This information is also used to project the future demand for DWSRF funds.

The Division contracts professional financial advisors and bond counsel to help keep abreast of changes in the financial market and both state and federal bond law. These professionals advise us on current market conditions so lending rates and repayment periods can be adjusted as needed. They also provide information on the consequences of leveraging, both in terms of funds that can be raised and the long-term effects of repaying the bondholders.

The DWSRF program is continually being reviewed in terms of future demand, changes in loan terms and the need to leverage the program. The primary concern is always to provide low cost loans to entities in Arkansas while maximizing the funds available so no one is turned away because of the lack of funds.

From time to time the Division, through Arkansas Development Finance Authority, issues bonds secured by the revenues from the pledged DWSRF project loans. Proceeds from any bonds issued will be deposited directly into the DWSRF. To the extent that it would benefit the program, ANRC may choose to exercise its option to cross-collateralize when issuing revenue bonds. The Division leveraged bonds for the first time in SFY 2012, EPA Region 6 was contacted regarding the leveraging prior to this activity.

VII. Financial Status

Arkansas' total funding sources for the DWSRF for this fiscal year are identified in [Chart 1](#). With the capitalization grants, the required state match for those capitalization grants, interest earnings, and loan repayments. An analysis of the Un-Liquidated Obligations is displayed in [Chart 3](#).

A. State Match Sources

The State of Arkansas agrees to deposit into the Drinking Water State Revolving Fund, or make available through a letter of credit or a letter of credit type instrument, monies in an amount equal to twenty percent (20%) of each quarterly grant payment on or before the date on which the State receives each payment from the grant award. The State of Arkansas will fund the required State Match by using State appropriations, grants from State funding programs, or servicing fees.

B. Leveraging of the Drinking Water State Revolving Fund

Arkansas leverages periodically to increase the funds available for assistance. Arkansas has no plans to leverage the Drinking Water program in this fiscal year. If Arkansas decides to leverage then EPA Region 6 will be contacted prior to leveraging.

C. Cash Draw Ratio Proportionality

Arkansas will disburse 100% of the state match for a capitalization grant first and then draw 100% of the Federal funds for that capitalization grant (less the set-asides). Arkansas is prohibited from disbursing State Match in any of the forms used for Additional Subsidization. As long as federal funds are required to be spent on Additional Subsidization, A.C.A. § 15-22-1102(b)(12)(B), Arkansas will continue this process for future federal cap grants.

VIII. Set Aside Programs and Amounts Requested

The Safe Drinking Water Act allows each state to set aside up to thirty 31% of its federal capitalization grant to support various drinking water programs including administration, technical assistance, state program management and special activities. Arkansas SSAF plans to use 27.2 % of the set-asides from the SFY 2018 grant for set-aside activities. A portion of the state program management set-aside (1.8% or \$300,800 and all of the small system technical assistance set-aside (2% or \$334,220) will be reserved for future use. In order to maintain no more than two open grants at a time, per EPA guidance, ADHE plans to return approximately \$275,000 of unspent state program management set-aside monies from the FY16 Cap Grant to the Loan Fund at the end of the current FFY18. Spending has been structured to modernize the program through data collection contracts, software updates, state laboratory equipment maintenance, etc. This modernization process will improve the efficiency of the overall program and assist in the reduction of our un-liquidated obligations. Arkansas SSAF has and will continue to request set-asides for non-routine investigative monitoring, such as the UCMR, LT2ESWTR source monitoring, and source water monitoring, for ADH laboratory equipment replacement, as needed, and for updating our Source Water Assessment and Protection Plan. To maximize public health protection potential and minimize un-liquidated obligations older set-aside funding will be transferred back to the DWSRF loan account as it is determined not to be needed by the SSAF.

A. Administration of the Drinking Water State Revolving Fund Program

Max Allowed: 4%

FFY2018 Estimated Allotment: \$668,440 (4%)

As provided for in SDWA § 1452(g)(2), the maximum allowed does not exceed 4 percent (4%) of all grant awards received by the DWSRF, \$400,000 per year, or 1/5 percent of the current valuation of the fund, whichever amount is greatest, plus the amount of any fees collected by the State for such purpose regardless of the source. The FFY2018 max allowed was calculated using an amount equal to 4 percent of all grant awards received less amounts that have been used in previous years to cover administrative expenses. For this period ANRC will budget 4% of the SFY 2018 Capitalization Grant award for administrative expenses.

The Water Division has the responsibility of managing the DWSRF program and will use the funds allocated to this set-aside program to defray the administrative costs associated with managing the program.

B. Small Systems Technical Assistance (SSTA)

Max Allowed: 2%

FFY2018 Estimated Allotment: 2% \$334,220

Banked cap grants: \$334,220

Total Reserved (all cap grants): *(\$3,255,443)

Arkansas Department of Health uses these funds to provide assistance to small water systems in assessing and implementing capacity development which will identify individual water system needs, provide corrective action plans addressing identified deficiencies (goal 40), and provide technical assistance in correcting these deficiencies (goal 1500 man-hours).

SSTA Reserved* for future use:

| Cap Grant | Amount Reserved | Amount to be re-claimed for use in SFY 2019 |
|--|------------------|---|
| 2007 | 6,083 | 0 |
| 2008 | 204,580 | 0 |
| 2009 (ARRA) | 489,700 | 0 |
| 2009 | 204,580 | 0 |
| 2010 | 410,780 | 0 |
| 2011 | 285,040 | 0 |
| 2012 | 271,640 | 0 |
| 2013 | 254,860 | 0 |
| 2014 | 270,680 | 0 |
| 2015 | 268,900 | 0 |
| 2016 | 254,380 | 0 |
| 2018 | 334,220 | 0 |
| Total Reserved: | 3,255,443 | 0 |
| Estimated total to be Re-Claimed in 2018 Cap Grant: | | 0 |

*Reserved funds include SSTA set-asides “originally” reserved for us on a future grant as well as any SSTA set-asides that were returned to the loan fund.

Remainder of page intentionally left blank.

C. State Program Management Program (PWSS)

Max Allowed: 10%
 FFY2018 Estimated Allotment: \$1,370,300 (8.2 %)
 Banked cap grants: \$300,800
 Total Reserved (all cap grants): **(\$6,423,845)

Funds will be used to enable the ADHE to continue to operate its Public Water Supply Supervision Program activities to insure compliance with requirements of the Safe Drinking Water Act. Funds will be used to support full time employees and related expenses including such items as salary, fringe, indirect costs, travel, training, office supplies, PC/LAN/GIS equipment and upgrades, laboratory equipment replacement, and similar routine costs. Day to day activities will include such activities as sanitary surveys (goal 150), engineering plan reviews (goal 1400), complaint investigations, compliance tracking and grading, and technical assistance in a variety of forms to water systems, administrative activities, and other act

PWSS Reserved* for future use:

| Cap Grant | Amount Reserved | Amount to be re-claimed for use in SFY 2019 |
|---|-----------------|---|
| 2001 | 141,241 | 0 |
| 2002 | 228,794 | 0 |
| 2003 | 128,908 | 0 |
| 2004 | 402 | 0 |
| 2009 (ARRA) | 2,448,500 | 0 |
| 2009 | 400,000 | 0 |
| 2010 | 500,000 | 0 |
| 2011 | 1,425,200 | 0 |
| 2012 | 850,000 | 0 |
| 2018 | 300,800 | 0 |
| Reserve Balance: | 6,423,845 | |
| Total To Be Re-Claimed in 2018 Cap Grant: | | 0 |

**Reserved funds include PWSS set-asides “originally” reserved for us on a future grant as well as any PWSS set-asides that were returned to the loan fund.

D. Wellhead Protection Program (WHP)

Max Allowed: 5%
 FFY2018 Estimated Allotment: \$835,550-(5.0%)

Arkansas Department of Health uses these funds to provide the necessary staff resources and support to enable the Section to continue implementation and expansion of its wellhead protection program and to insure an updated and well-maintained GIS database system. Tasks include delineation of wellhead protection areas, assistance to public water systems in well siting, aquifer identification and recommended construction features, inventories for sources of contamination in source water assessment areas, hydrologic sensitivity assessments of water sources, public outreach efforts on the importance of source water protection, and other activities. A mix of the 2016 and 2017 cap grant allotments will be used in this fiscal year.

E. Capacity Development Program (CD)

Max Allowed: 10%

FFY2018 Estimated Allotment: \$1,671,100 (10%)

Arkansas Department of Health uses these funds to accomplish the overall objective under this set-aside which is to provide a variety of technical assistance and public education activities, which will help to ensure continued sustainability and performance of public water systems in the state. Activities to be accomplished under this set-aside include such items as training and technical assistance to water systems in drafting CCRs (goal 692), water operator training and certification, publish and disseminate an informative quarterly newsletter (goal 3500 copies) for operators and other interested parties, a coordinated review of and protection from proposed point and non-point discharges (goal 800 miscellaneous permits) into sources of drinking water, provide assistance to water systems in developing local source water protection plans, participation in EPA’s Area Wide Optimization Program efforts, conducting Comprehensive Performance Evaluations at water systems (goal 3 CPEs), and other activities. This effort will require full time employees and associated expenses. .

IX. Small System Assistance

Arkansas is required to allocate a minimum of 15% of the total funds available each year to funding small systems. Small systems are defined as systems that regularly serve 10,000 or fewer persons. In Arkansas there are approximately 689 Community Public Water Systems (PWS). Of those systems, approximately 58 serve a retail population of over 10,000 people and 631 serve a population of 10,000 or less.

Arkansas has worked hard with the small systems to help them meet all of the regulatory requirements of the DWSRF program. However, over the last few years, the small systems have found the DWSRF program to be slow and cumbersome and have looked elsewhere for funding. By working with applicants, the Water Division continues to be able to interest small systems in the program. We expect to sign Bond Purchase Agreements (Binding Commitments) on nine (9) systems of which seven (7) are to small systems, see [Chart 4](#).

Arkansas is required to demonstrate that at least 15% of the funds are used for small systems (SFY 2017 NIMS data).

| NIMS Data as of June 30, 2017 | |
|--------------------------------|----------------|
| Cumulative Loans | \$ 274,634,147 |
| Cumulative Small Systems | \$ 136,467,800 |
| Percentage of Small System BCs | 49.69% |

| Estimated as of Jun 30, 2019 | |
|--------------------------------|----------------|
| Cumulative Loans | \$ 300,312,247 |
| Cumulative Small Systems | \$ 146,527,800 |
| Percentage of Small System BCs | 48.79% |

Arkansas is committed to continually modifying the DWSRF program in an effort to make the program more attractive to small systems. ANRC continues to work towards a streamlined application process and shorter time for planning and design work.

ANRC has ongoing marketing plans at various conferences and meetings describing the benefits of the Revolving Loan Fund program available to cities and communities. As always, we evaluate the need to lower the interest rates to cities that request funding. Our goal is to provide a subsidy without harming the program in the long term.

X. Capacity Assessment

The SDWA requires that a public water system applying for a DWSRF loan must show that it has the technical, financial and managerial capacity to ensure compliance. If a system does not have adequate capacity, assistance may only be provided if it will help the system to achieve capacity. The goal of this requirement is to ensure that the DWSRF assistance is not used to create or support non-viable systems.

A. Technical Capacity

To demonstrate technical capacity, Drinking Water State Revolving Fund loan applicants must show that drinking water sources are adequate, that the system's source, treatment, distribution and storage infrastructure are adequate and that personnel have the technical knowledge to efficiently operate and maintain the system. As part of reviewing a loan application, Arkansas Department of Health will review the system's records to assure that the system is being properly operated and maintained. The water system must not have outstanding water compliance problems unless the DWSRF project is intended to correct those problems. The engineering reports, plans, and specifications for the proposed DWSRF project and the system's technical capacity will all be evaluated during the loan application process.

B. Financial Capacity

To demonstrate financial capacity, the applicant must show that the system has sufficient revenues to cover necessary costs and demonstrate credit worthiness and adequate fiscal controls. ANRC will review the applicant's Self-Assessment Worksheets, the project budget, annual financial reports, and other financial information to ensure adequate financial capacity of the applicant.

C. Managerial Capacity

To demonstrate managerial capacity, the water system must have personnel with expertise to manage the entire water system operation. Arkansas Department of Health will review the applicant's managerial capacity through supporting documentation to assure that management is involved in the day to day supervision of the water system, is responsive to all required regulations, is available to respond to emergencies and is capable of identifying and addressing all necessary capital improvements and assuring financial viability. The water system must have a qualified water operator in accordance with the state's operator certification program. After reviewing the water system's technical and managerial capacity, ADH sends a letter to the application submitter and ANRC stating whether the system is eligible to be placed on the Priority List to receive DWSRF assistance.

D. Long-Term Capacity

Arkansas Department of Health Engineering Section (ADHE) will assess whether each water system has a long-term plan to undertake feasible and appropriate changes in operations necessary to develop adequate capacity. In making these assessments, the ADHE will consult with local health departments and review water resource management strategies, comprehensive studies, the State's response to the Drinking Water Needs Survey and other available engineering reports in an effort to improve the overall capacity of systems requesting assistance. ADHE will encourage consolidation efforts when two or more systems can benefit and also encourage other options, such as contract management or partnerships with other communities in their area. The priority ranking criterion provides additional points to encourage this objective.

XI. Transfer Process

Arkansas is reserving the authority to transfer up to thirty-three percent (33%) of the DWSRF 2018 federal capitalization grant to the 2018 Clean Water State Revolving Fund allotment. These funds will be transferred from DWSRF construction to CWRLF construction and will not affect the total amount available for set-asides. Currently there are no plans to transfer any funds for this fiscal year.

XII. Cross-Collateralization Process

The Division implemented a system for leveraging bonds and part of that system is cross-collateralization. The Division is not planning on leveraging this fiscal year.

XIII. Audits and Reporting

Arkansas' Intended Use Plans and Annual Reports will be posted on our website:
<http://anrc.ark.org/divisions/water-resources-development/>

An independent audit, and single audit (as required), will be conducted by an outside Certified Public Accounting firm annually.

Project milestones and information are reported through EPA's Drinking Water Project Benefits Reporting database (PBR), the Federal Funding Accountability and Transparency Act (FFATA) Requirement, as well as The National Incident Management System (NIMS). These databases will be updated no less than quarterly. However, the goal is to update monthly.

XIV. Intended Use Plan Amendment Procedures

Revisions to this Intended Use Plan that are determined significant will require Public Notice and EPA notification and approval. Revisions to this Intended Use Plan which are deemed to be insignificant shall be made by the Division with notification to EPA. Any changes in the project funding list shall be in accordance with procedures provided in the DWSRF Priority System and List.

* Water Efficiency - project expected to include GPR elements, determination of amount or percentage upon receipt of detailed bid tabs.

** Disadvantaged projects receiving principal forgiveness under the Arkansas Disadvantaged Community Assistance Program = \$3,783,000

Total principal forgiveness = \$7,200,000

Appendices:

Appendix A – Project Priority List

Priority Setting Procedures for Drinking Water State Revolving Loan Fund

Priority Points shall be used for ranking proposed drinking water projects for eligibility for funding from the Drinking Water State Revolving Loan Fund (Fund). The points system presented below will be used.

A project otherwise determined to be eligible under the Fund may not receive funding for improvements that were not included in the original project for which priority points were assigned. The additional unranked improvements must rely on alternate funding sources for these improvements, or wait for the next funding cycle for a new point's assessment. Fundable projects proposing to omit specific improvements for which points were assigned must show that this will not compromise public health and will not otherwise impair the water system's capacity when compared to the original project. Acceptable downsized projects will be reassessed and re-ranked under the priority ranking system, possibly resulting in a lower priority status.

| PRIMARY MCL VIOLATIONS FACTORS | POINTS |
|--|--------|
| 1. Surface Water or Groundwater under the direct influence of surface water with no filtration | 100 |
| 2. Treatment technique violations, microbiological MCL violations | |
| a. Total points for first two violations | 100 |
| b. Points for additional violations after first two | 5 |
| c. Points for imminent violation of future regulation | 50 |
| 3. Acute Chemical Violations | |
| a. Total points for first two violations | 100 |
| b. Points for additional violations after first two | 5 |
| c. Points for imminent violation of future regulation | 50 |
| 4. New Service Areas for area(s) with contaminated private drinking water sources | |
| a. Points for Microbial Contamination | 100 |
| b. Points for Acute Chemicals | 100 |
| c. Points for Other Chemicals | 50 |
| 5. Chemical MCL Violations | |
| a. Total points for first two violations | 50 |
| b. Points for additional violations after first two | 5 |
| c. Points for imminent violation of future regulation | 50 |
| SOURCE VULNERABILITY FACTOR | POINTS |
| 1. Vulnerable to point or non-point upstream discharge | |
| a. Microbiological | 25 |
| b. Industrial, agricultural, or mineral | 15 |
| c. Unprotected watershed | 15 |
| CONSOLIDATION / INTERCONNECTION FACTOR | POINTS |
| 1. Consolidation with an existing system | |
| < 40 service connections | 50 |
| 41 – 200 | 40 |
| 201 - 1,320 | 30 |
| 1,321 - 4,000 | 20 |
| > 4,000 | 10 |
| 2. Interconnection with an existing system | |
| < 40 service connections | 25 |
| 41 – 200 | 20 |
| 201 - 1,320 | 15 |

| | |
|--|---------------|
| 1,321 - 4,000 | 10 |
| > 4,000 | 5 |
| AFFORDABILITY FACTOR | POINTS |
| 1. Total Population Served: Service Connections < 1,321 | 10 |
| 2. Affordability Ratio | |
| a) > 2.49 % | 15 |
| b) 2.0 % - 2.49 % | 12 |
| c) 1.5 % - 1.99 % | 9 |
| d) 1.0 % - 1.49 % | 6 |
| e) <1.0 % | 3 |
| OTHER DEFICIENCIES FACTOR | POINTS |
| 1. Secondary MCL violation | 25 |
| 2. Fluoridation start-up | 5 |
| 3. Quantity deficiencies | |
| Continual/frequent outages | 25 |
| Peak demand/daily shortages | 20 |
| Peak demand/seasonal shortages | 10 |
| Peak demand/sporadic shortages | 5 |
| 3. Design deficiencies | |
| Disinfection | 10 |
| Chemical Feed | 8 |
| Mixing | 8 |
| Clarification | 8 |
| Filtration | 8 |
| Storage | 8 |
| Distribution/low pressures | 10 |
| Distribution/deteriorated mains | 8 |
| Distribution/unaccounted for water | 8 |
| Treatment capacity | 8 |
| Intake structure | 8 |
| Well construction | 10 |
| BONUS POINTS | POINTS |
| 1. Board Member or City Council Training in the past 5 years | 15 |
| 2. Up-to-date Asset Management Plan | 10 |

Eligibility for Priority Points

Projects for public water systems shall not be eligible for points in any category unless they meet the requirements specified below for that category. Should two or more projects accumulate the same number of points, priority will be given beginning with the project serving the least population and moving to the project serving the next higher population, until all projects with that point total are prioritized.

It should be noted that discretion will be used in the awarding of points in the following categories. If a public water system is accumulating violations due to negligence or inattention on the part of the system, points will not be awarded. The system must be taking reasonable actions to achieve compliance.

Primary MCL Violations Factors

- 1) Surface Water or Ground Water under the direct influence of surface water with inadequate filtration
 - a) Points will be awarded only for a water system that currently is required by the Safe Drinking Water Act to provide filtration, and the system does not have a filtration system that complies with the Safe Drinking Water Act regulations. In the case of consolidating systems where the project applicant does not qualify, but one of the

consolidating systems does, then points will be awarded based on the consolidating system. If there are multiple consolidating systems within the same project which are SW or GWUDI, then an additional five (5) points will be awarded for each system after the first.

- 2) Treatment technique violations and microbiological MCL violations.
 - a) Points will be awarded only for a water system that has had more than one treatment technique or microbiological MCL violation of the Safe Drinking Water Act during the eighteen months preceding the date of the most recent ranking questionnaire.
 - b) Each microbiological MCL violation and treatment technique violation will be counted as an individual violation, even if they occur in the same month. Points can be awarded for multiple violations of the same type or in combination with other violation types, (e.g.; if a system had both a microbiological MCL and a treatment technique violation in the same month, they would get points for two violations in that month.).
 - i) One hundred (100) points total will be awarded for the first two (2) violations.
 - ii) Five (5) points will be awarded for each additional violation.
 - iii) Fifty (50) points may be awarded to a project whose purpose is to prevent a future NPDWS treatment technique or microbiological violation based upon promulgated EPA regulations or EPA regulations which are essentially final, but not yet promulgated.
- 3) Acute Chemical & Chemical MCL violations.
 - a) Points will be awarded only for a water system that currently has contamination from a Safe Drinking Water Act regulated contaminant, or other chemical contaminant for which no MCL has been adopted, which presents an acute health risk to consumers, based on EPA standards, health advisories, or other peer reviewed health risk studies found acceptable to the Department.
 - i) One hundred (100) points will be awarded for the first two (2) violations.
 - ii) Five (5) points will be awarded for each additional violation.
 - iii) Fifty (50) points may be awarded to a project whose purpose is to prevent a future NPDWS violation based upon promulgated EPA regulations or EPA regulations which are essentially final, but not yet promulgated.
- 4) New Service Area for Area(s) with contaminated Private Drinking Water Sources. Points may be awarded for a project to provide public drinking water service to an unserved area provided that:
 - a) At least 10% of the private water sources in the project area are sampled at random for microbiological contamination and at least 50% of those samples are coliform positive; or
 - b) At least 10% of the private water sources in the project area are sampled at random for a regulated acute chemical contaminant and at least 50% of those samples exceed the Maximum Contaminant Level or Action Level specified by EPA; or
 - c) At least 10% of the private water sources in the project area are sampled at random for other chemical contaminants and at least 50% of those samples exceed the Maximum Contaminant Level or Action Level specified by EPA.
- 5) Chemical MCL Violations. Points will be awarded only for a water system that currently has contamination from a Safe Drinking Water Act regulated contaminant at a level which exceeds the MCL or Action Level specified by EPA, and has not already received points under “Acute Chemical Violations.”
 - a) Each chemical MCL violation will be counted as an individual violation, even when multiple violations occur in the same reporting period. Points can be awarded for multiple violations of the same type (inorganic, organic, radiochemical, etc.) or in combination with other violation types, (e.g.; if a system had both an arsenic MCL and a barium MCL in the same reporting period, they would get points for two violations in that reporting period.).
 - i) Fifty (50) points will be awarded for the first two (2) violations.
 - ii) Five (5) points will be awarded for each additional violation.
 - iii) Fifty (50) points may be awarded to a project whose purpose is to prevent a future NPDWS violation based upon promulgated EPA regulations or EPA regulations which are essentially final, but not yet promulgated.

Source Vulnerability Factors

- 1) Source Vulnerable Due to Contamination from a Point or Non-point Source Discharge (with the potential to cause microbiological contamination). Points will be awarded only to a surface water source where there exists identifiable point or non-point discharges which can be documented to result in, or can potentially result in, instances where the raw water coliform concentrations exceed the limitations set forth in Section IX.A of the “Rules and Regulations Pertaining to Public Water Systems”, or otherwise cause significant microbiological contamination of the source water.
 - a) Source Vulnerable Due to Contamination from Industrial Operations. Points will be awarded for a water source where analyses indicate the occasional presence of hazardous chemicals from an industrial source. In the case of a

water system utilizing a ground water source, points will be awarded when documentation is provided that a contaminant plume exists in the source aquifer and is approaching the wellhead.

- b) **Source Vulnerable Due to Contamination from Agricultural Operations.** Points will be awarded for a water source where analyses indicate the occasional presence of agricultural chemicals. Points will be awarded in the case of a water system utilizing a ground water source, only when analyses indicate the occasional presence of contaminants of agricultural origin in the source water or documentation of a contaminant plume in the source aquifer which is approaching the wellhead.
- c) **Source Vulnerable Due to Potential Contamination from Oil, Gas, or Mineral Operations.** Points will be awarded for a surface water source where analyses indicate the occasional presence of contaminants from oil, gas, or mineral operations. Points will be awarded for a ground water source where the recharge area contains oil, gas, or mineral operations that have caused a plume of contamination that is approaching the water supply wellhead.
- d) **Source with Inadequate Buffer Zone.** Points will be awarded for a surface water source where the required 300-foot buffer zone required under the Arkansas Rules and Regulations Pertaining to Public Water Systems has not been obtained. Points will be awarded for a ground water source where the 100-foot radius buffer area zone required in these regulations has not been obtained.

Consolidation/Interconnection Factor

1. **Consolidation with an Existing System.** Points will be awarded only for systems which agree to legally merge with another water system which is fully compliant with Safe Drinking Water Act water quality regulations or will become compliant as a result of the merger. In cases where multiple systems will consolidate, point assignments will be based upon the number of service connections of the smallest system. Extra points for additional consolidating systems under the same project will be assigned at a rate of ten percent (10%) of the original rate for each additional consolidating system.
2. **Interconnection with an Existing System.** Points will be awarded only for systems which propose an interconnection and water purchase agreement with another water system, which is SDWA compliant, as a means of resolving a water quantity or quality problem for which points are awarded. In cases where multiple systems will interconnect, point assignments will be based upon the number of service connections of the smallest system. Extra points for additional systems under the same project will be assigned at a rate of ten percent (10%) of the original rate for each additional consolidating system.
3. Projects are eligible for either consolidation points or interconnection points, but not both.

Affordability Factor

1. **Total Population Served.** Points will be awarded for systems serving fewer than 1321 service connections.
2. **Affordability Ratio.** Points will also be awarded based on the value of the Affordability Ratio, calculated as the current average yearly residential rate, based on a usage of 4000 gallons of water per month, divided by the Median Household Income. The Median Household Income shall be based on the entire service area of the project water system using the most current information available.

Other Factors – Public Health Improvements or Deficiencies

1. **Secondary MCL Violations.** Points will be awarded only for those water systems where analyses document that a violation of an MCL for any of the Secondary Drinking Water Standards has occurred.
2. **Fluoridation start-up.** Points will be awarded for those water systems adding installing fluoridation to the treatment process.
3. **Quantity Deficiencies**
 - a. **Continual Shortage (Frequent Outages).** Points will be awarded only for a water system that experiences frequent complete pressure losses, which are the result of demand exceeding supply, and are not the result of main break, equipment failure, lack of proper maintenance, or other operational failures.
 - b. **Shortage During Peak Demand Period (Daily).** Points will be awarded only for a water system that frequently experiences minimal pressures due to daily demand exceeding supply.
 - c. **Shortage During Peak Demand Period (Seasonal).** Points will be awarded only for a water system that has to routinely issue conservation orders during heavy use periods or experiences minimal pressures during heavy use periods.
 - d. **Occasional Shortage During Peak Demand Period.** Points will be awarded only for a water system that, once or twice a year, experiences some pressure loss due to peak demands.

4. Design Deficiencies

- a. Inadequate Disinfection. Points will be awarded for a water system that either does not disinfect or does not continuously disinfect due to equipment failure or lack of adequate feed rate capacity. Points may also be awarded for inadequate chlorine contact time (CT) as defined by regulation.
- b. Inadequate Chemical Feed. Points will be awarded only for a water system that is unable to either reliably or consistently feed adequate chemicals to meet treatment objectives.
- c. Inadequate Mixing. Points will be awarded only for a water system whose rapid mixing detention time is inadequate based on Department design standards.
- d. Inadequate Clarification. Points will be awarded for a water system whose clarification process is functioning improperly due to an inadequate detention time, using Department accepted design standards. Points will be awarded for a water system where improper functioning is occurring due to mechanical or structural failure.
- e. Inadequate Filtration. Points will be awarded for a water system whose filtration process is functioning improperly due to excessive filtration rates, damaged underdrains, or other physical plant defects. Points shall not be awarded under this section if points were awarded under the section pertaining to filtration of surface water or groundwater under the direct influence of surface water.
- f. Inadequate Storage. Points will be awarded only for a water system whose usable storage is less than one day's average system demand.
- g. Inadequate Distribution (Low Pressures). Points will be awarded only for a water system that has areas of chronic low pressure due to localized peak demands.
- h. Inadequate Distribution (Deteriorated Mains). Points will be awarded only for a water system that has chronic consumer complaints that can be directly tied to the deterioration of cast iron, galvanized, or other metal piping, or has frequent main breaks due to deteriorated pipe.
- i. Inadequate Distribution (Unaccounted for Water). Points will be awarded only for a water system that has unaccounted for water at a level that exceeds 10% of average daily production.
- j. Inadequate Treatment Unit Capacity. Points will be awarded only for a system whose plant, or individual process units in the plant, are undersized for process flow rates determined by using Department accepted design standards.
- k. Inadequate Intake Structure. Points will be awarded only for a water system whose intake structure is either unable to deliver an adequate quantity of water or whose intake structure will not allow for adjustment of withdrawal depth.
- l. Improper Well Construction. Points will be awarded only for a water system whose well is vulnerable to surface drainage into the well from improper wellhead and appurtenances construction or inadequate casing and/or grouting.

Bonus Points

1. Board Member or City Council Training in the past 5 years. Points will be awarded to systems for training.
2. Up-to-date Asset Management Plan. Points will be awarded only for a water system whose Asset Management Plan is current.

Appendix B - EPA Assurances

Arkansas' Intended Use Plan includes the following assurances as required by the EPA DWSRF Program Guidelines and 40 C.F.R. §35.3550.

Arkansas requires all projects to comply with federal requirements and that equivalency will not be used.

1. Assurance that the State has the authority to establish a fund and to operate the DWSRF program in accordance with the Safe Drinking Water Act.
 - The Arkansas Safe Drinking Water Fund Act (ACT 772 of 1997), ANRC Regulation XV and the Interagency Agreement between the ADH, the ADFA and ANRC establishes the proper authority, assigns responsibilities and sets up the necessary funds to manage the SDWA, section 1452 programs.
2. Assurance that the State will comply with State statutes and regulations.
 - The State of Arkansas agrees to comply with all State statutes and regulations that are applicable to DWSRF funds, including Federal Capitalization Grant funds, state match, interest earning, bond proceeds and repayments, and funds used for set-aside activities.
3. Assurance that the State has the technical capability to operate the program.
 - Since 1961 ANRC has administered State financial assistance programs. The ANRC currently manages both the DWSRF and the CWRLF programs.
 - With the exception of Administration, the ADH manages the set-aside programs. There 22 new staff positions were created upon the availability of the initial set-aside funds. ADH has been granted primacy from the EPA to administer the State Public Water Supply Supervision program and continues to receive favorable reviews from the EPA Region 6 staff.
 - The ADFA manages the banking, fund accounting and auditing requirements. It has administered the CWRLF program since 1987 and many other state and federal financial assistance programs. No new staff positions are anticipated.
4. Assurance that the State will accept Federal Capitalization Grant funds in accordance with a payment schedule.
 - The State of Arkansas agrees to accept the federal grant payments in accordance with the negotiated payment schedule and use those payments for the activities of the DWSRF and State set-aside programs under SDWA Section 1452.
5. Assurance that the State will enter into binding commitments with assistance recipients to provide assistance from the Fund.
 - Binding commitments must be made in an amount equal to the amount of each capitalization grant payment and accompanying State match that is deposited into the Fund and must be made within one year after the receipt of each grant payment.
 - A State may make binding commitments for more than the required amount and credit the excess towards the binding commitment requirements of subsequent grant payments.
 - If a State is concerned about its ability to comply with the binding commitment requirement, it must notify the RA and propose a revised payment schedule for future grant payments
6. Assurance that the State will deposit all Federal Capitalization Grant funds in the fund or set-aside accounts.
 - The State of Arkansas agrees to deposit all the Federal Capitalization Grant funds into the Drinking Water State Revolving Fund account except for those portions of the grant that Arkansas intends to use for set-aside purposes authorized under the SDWA (Section 1452(a)(1)(b)). Funds for set-aside activities will be placed in separate accounts inside the SDWF but outside the DWSRF account.
7. Assurance that the State will provide an amount at least equal to 20 percent of the Federal Capitalization Grant (state match) in the Fund.
 - The State of Arkansas agrees to provide an amount into the DWSRF equaling at least 20% of the amount of each Federal Capitalization Grant.
8. Assurance that the State will deposit net bond proceeds, interest earning, and repayments into the Fund.
 - The State of Arkansas agrees to credit the applicable proportion of net bond proceeds and interest earnings, and the DWSRF borrower's principal and interest repayments into the Arkansas DWSRF.
 - The State of Arkansas also agrees to deposit any 1452(k) (1) loans principal and interest repayments into the Arkansas DWSRF.
9. Assurance that the State will match Federal Capitalization Grant funds uses for 1452(g) (2) set-asides.
 - The State of Arkansas agrees to provide 100% state match funds equaling its Federal Capitalization Grant for 1452(g) (2) set-asides.
10. Assurance that the State will use Generally Accepted Accounting Principles.

- The State of Arkansas agrees to establish fiscal controls and accounting systems, according to Generally Accepted Accounting Principles (GAAP) as promulgated by the Governmental Accounting Standards Board, that are sufficient to account for and report DWSRF Program activities.
11. Assurance that the State will have the fund and set-aside accounts audited annually in accordance with Generally Accepted Government Auditing Standards (GAGAS).
 - The State of Arkansas agrees to conduct an annual audit on the Arkansas Safe Drinking Water Fund in accordance with Generally Accepted Government Auditing Standards (GAGAS).
 12. Assurance that the State will adopt policies and procedures to assure that borrowers have a dedicated source of revenue for repayments (or in the case of a privately owned system, demonstrated that there is adequate security).
 - The State of Arkansas requires all DWSRF borrowers to have a dedicated source of revenues for repayments (or in the case of a privately owned system, demonstrated that there is adequate security) per ANRC Title XV.
 13. Assurance that the State will commit and expend funds as efficiently as possible and in an expeditious and timely manner.
 - The State of Arkansas agrees to commit and expend all funds allotted under SDWA section 1452 “as efficiently as possible” (Section 1452(g) (3)) and in an expeditious and timely manner.
 - Federal EPA/ACH payments shall be expended within 16 quarters from scheduled payment dates. The Bond proceeds shall be expended within 3 years from the bond issue dates. The State Match funds shall be expended in a prudent and expeditious managerial manner.
 14. Assurance that funds will be used in accordance with the Intended Use Plan.
 - The State of Arkansas agrees to expend DWSRF funds in accordance with the Intended Use Plan (Section 1452(b)) that has undergone public review and comment.
 15. Assurance that the State will provide EPA with an annual report.
 - The State of Arkansas DWSRF agrees to complete and submit an annual report with available financial information to the Region within 90 days after the end of the States reporting period.
 16. Assurance that the State will comply with all Federal cross-cutting authorities.
 - The State of Arkansas agrees to ensure that all applicable Federal cross-cutting authorities will be complied with.
 17. Assurance that the State will comply with the American Iron and Steel (AIS) requirements.
 - P.L. 114-113, The Consolidated Appropriations Act, 2016, includes an American Iron and Steel (AIS) requirement in section 424 that requires Clean Water State Revolving Loan Fund and Drinking Water State Revolving Fund assistance recipients to use iron and steel products that are produced in the United States for projects for the construction, alteration, maintenance, or repair of a public water system or treatment works if the project is funded through an assistance agreement executed beginning January 17, 2014 (enactment of the Act), through September 30, 2016 (the end of Federal Fiscal Year 2016).
 18. Assurance of Competency.
 - In 2013 EPA Issued the directive FEM 2012-2 Rev. 1, requiring organizations generating or using environmental measurement data under EPA-funded agreements to submit documentation of their competency prior to performing new grant-funded work. The directive is effective for grants totaling more than \$200,000 and issued or renewed after October 1, 2013. The goal of the directive is to assure that organizations (and their grantees/contractors) performing environmental data operations have effective quality management systems and the technical competence to generate valid environmental data.
 - Competency is demonstrated through the Arkansas Department of Health’s Quality Management Plan (QMP) submitted to and approved by EPA annually. The QMP provides descriptions of the quality policies, including all requirements described in EPA QA/R-2. The Arkansas Department of Health QA manger will ensure implantation of the directive through coordination with the individual EPA Programmatic Project Officers. The ADH also submits to and receives approval from EPA a Quality Assurance Project Plan (QAPP) every four years. The QAPP address the collection of environmental data made during water quality monitoring and sanitary survey program activities.
 19. Signage
 - Arkansas agrees to comply with the SRF Signage Guidance in order to enhance public awareness of EPA assistance agreements nationwide.
 20. Arkansas will be in compliance with the following federal requirements:
 - Federal Socioeconomic Cross-Cutters (DBE etc.)
 - Federal Environmental crosscutters
 - Federal Funding Accountability and Transparency ACT (FFATA) reporting
 - Single Audit Act (OMB A-133)
