Report Samples

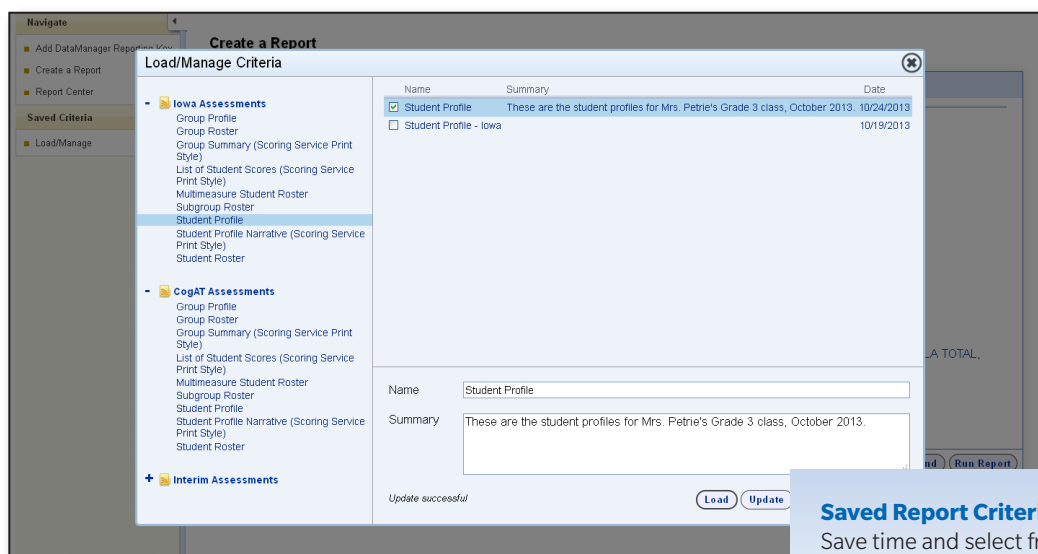

Riverside® Interim Assessments

DataManager, an easy to navigate online resource, allows you to streamline the management and reporting of **Iowa Assessments Forms E and F***, **Cognitive Abilities Test (CogAT) Form 7**, **CogAT Screening Form**, and the **Riverside Interim Assessments**.

Use **DataManager** to:

- Prepare for test events
- Administer assessments
- View reports
- Interpret results
- Access digital resources

DataManager is your single source for supporting a comprehensive, balanced assessment program and is flexible enough to serve the different needs of varied districts or dioceses, from central scoring of answer documents or local plain-paper scanning to testing online.

Saved Report Criteria

Save time and select from the list of saved report criteria to view results again. Click a display type bookmark under the assessment type to view the report criteria you have saved.

Powerful Web-based Reporting

DataManager offers powerful web-based reporting so that all stakeholders—families, teachers, and administrators—can get the most out of the data from the assessment. Web-based reporting offers more flexibility in working with data than a static paper report, and gives you the ability to:

- Create dynamic displays with the click of a mouse
- Compare data by different classes, different buildings, or review summary data for content area totals
- Drill down to individual tests and analyze performance on diagnostic skills and use the information to inform instruction
- Access your data on demand

Optional paper reports can be added to our robust online reporting to create a unique combination of services that best suits the needs of your school, district, and students.

Report Center in DataManager

The Report Center in **DataManager** provides additional flexibility in viewing reports with streamlined and enhanced navigation for ease of use.

Use the Report Center to:

- Create, save and manage your own unique report criteria in the Reports application
- Set up multiple reports to run concurrently while continuing to work within any **DataManager** application until the reports are ready for view
- Run reports for large groups of students in a “batch” mode without being tied up waiting on processing
- Run and print a suite of **Riverside Central Scoring Service** style paper report PDF's

**Form F levels 9-17/18 now available. Levels 5/6-8 available in Spring 2014.*

In the upper part of this report, scores are printed for the tests, totals, and composites. Several types of scores are reported, including the NPR and LPR. The NPR represents the percent of students in the same grade throughout the nation with a lower score. The LPR represents the percent of students in the same grade in your local area with a lower score.

The horizontal bands in the NPR Graph illustrate the student's performance on each test relative to the other test areas. The horizontal bars represent the NPRs for each test. The lengths of these bars permit identification of the student's stronger and weaker areas of achievement.

The lower part of the report provides information about the skill domains measured by each test. It also summarizes data by the different levels of cognition required by the items in some tests. The number of items for each domain and cognitive level, the number attempted, the percent correct for the student, and the average percent correct for students in this grade throughout the nation are reported. The difference between the student's percent correct and the national percent correct is displayed as a horizontal bar.

■ = National Percentile Rank

Notes:

Aiden's ability profile is 5A. Visit www.cogat.com for more detailed information on profile 5A. Click on the "Interactive Profile Interpretation System" button. Enter 5A in the "Input Your Score Profile" section. Click "Search".

Overview

Aiden recently took the Cognitive Abilities Test (CogAT). CogAT measures the development of verbal, mathematical, and spatial reasoning abilities that are essential for success in school. Students with different patterns of scores on CogAT have different learning styles. By knowing Aiden's learning preferences, teachers can help him achieve greater success in school.

Aiden's Profile of Test Scores

Aiden's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful:

- Build on Aiden's strengths by encouraging academic accomplishments in areas that interest him.
- Point out how new skills and information build on knowledge and skills Aiden already has.
- Show Aiden how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Aiden work with a partner to follow them.
- Teach Aiden study skills such as planning use of time, formulating questions to guide study, and taking notes.

More Information on Aiden's Scores

The sections to the left explain Aiden's performance using different types of comparisons and score scales.

- The Age Scores section compares his performance to students across the nation who are also 8.6 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 3.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Aiden's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell below the score obtained by Aiden.

The Profile Narrative presents essential scores and information about a student's performance. Use it to:

- Identify strengths and weaknesses
- Inform placement decisions
- Make comparisons
- Report assessment scores to families

Overview

Aiden recently took the Cognitive Abilities Test (CogAT) Screening Form. The CogAT Screening Form is a short form of CogAT. Both the CogAT Screening Form and the complete CogAT measure students' learned reasoning abilities developed through in-school and out-of-school experiences.

More Information on Aiden's Scores

The sections to the left explain Aiden's performance on the three subtests and the total score using different types of comparisons and score scales.

- The Raw Scores section provides information on the number of items in each subtest, the number of items that Aiden attempted to answer and the number of items that Aiden answered correctly.
- The Age Scores section compares his performance to students across the nation who are also 8.6 years old.
- The Grade Scores section compares his performance to students across the nation who are also in grade 3.
- The Local Scores section compares his age score performance to students in your local area who are also in grade 3.

Each of these sections includes one or more scores. The Stanine reports Aiden's performance on a scale from 1 (lowest) to 9 (highest). The Percentile Rank indicates the percentage of students in each comparison group whose scores fell at or below the score obtained by Aiden.

State: State 1
Form-Level: 7-9
Test Date: 10/2013
Norms: Fall 2011
Grade: 3
Page: 1

Bagsby, Aiden		ID Number 1	DOB	Grade	Level	Form	Test Date	Norms	I.D. Number 2	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Z	Program	CogAT®
		0000147548	04/05	3	9	7	10/13	Fall 2011																				
Tests	No. of Items	No. Raw Score	USS	Age Scores			Grade Scores			Local Scores			Profile Score 5A: Aiden's scores on the three batteries do not differ significantly. All three of his scores are in the range typically observed in students of this age. For students who have reasoning scores in the average range, the following steps may be helpful: Build on Aiden's strengths by encouraging academic accomplishments in areas that interest him. Point out how new skills and information build on knowledge and skills Aiden already has. Show Aiden how to break complex tasks into simpler steps. Model the steps as you explain them. Write the steps on a sheet of paper and let Aiden work with a partner to follow them. Teach Aiden study skills such as planning use of time, formulating questions to guide study, and taking notes.															
Verbal	62	62	52	181	108	66	6	69	6	75	6																	
Quantitative	52	52	32	163	96	35	4	38	4	44	5

Brigerton, Ryan		ID Number 1	DOB	Grade	Level	Form	Test Date	Norms	I.D. Number 2	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Z	Program	CogAT®
		0000133627	09/04	3	9	7	10/13	Fall 2011																				
Tests	No. of Items	No. Raw Score	USS	Age Scores			Grade Scores			Local Scores			Profile Score 8A: Ryan's scores on the three batteries do not differ significantly. All three of his scores are in the above-average range. Students with above-average reasoning scores learn relatively quickly. The following recommendations may help Ryan achieve in school: Encourage Ryan to discover concepts and principles rather than always providing answers. Projects that develop the student's interests can be particularly effective. Challenge Ryan with materials, projects, and problems that are more difficult than those used for the typical student. Expose Ryan to different learning or problem-solving strategies to help him understand their value for different tasks. When working in groups, permit Ryan to learn by explaining information, helping to summarize, and modeling higher-order thinking skills.

The Subgroup Roster allows you to group and view data by particular subgroups, such as gender, ethnicity, or program administration codes.

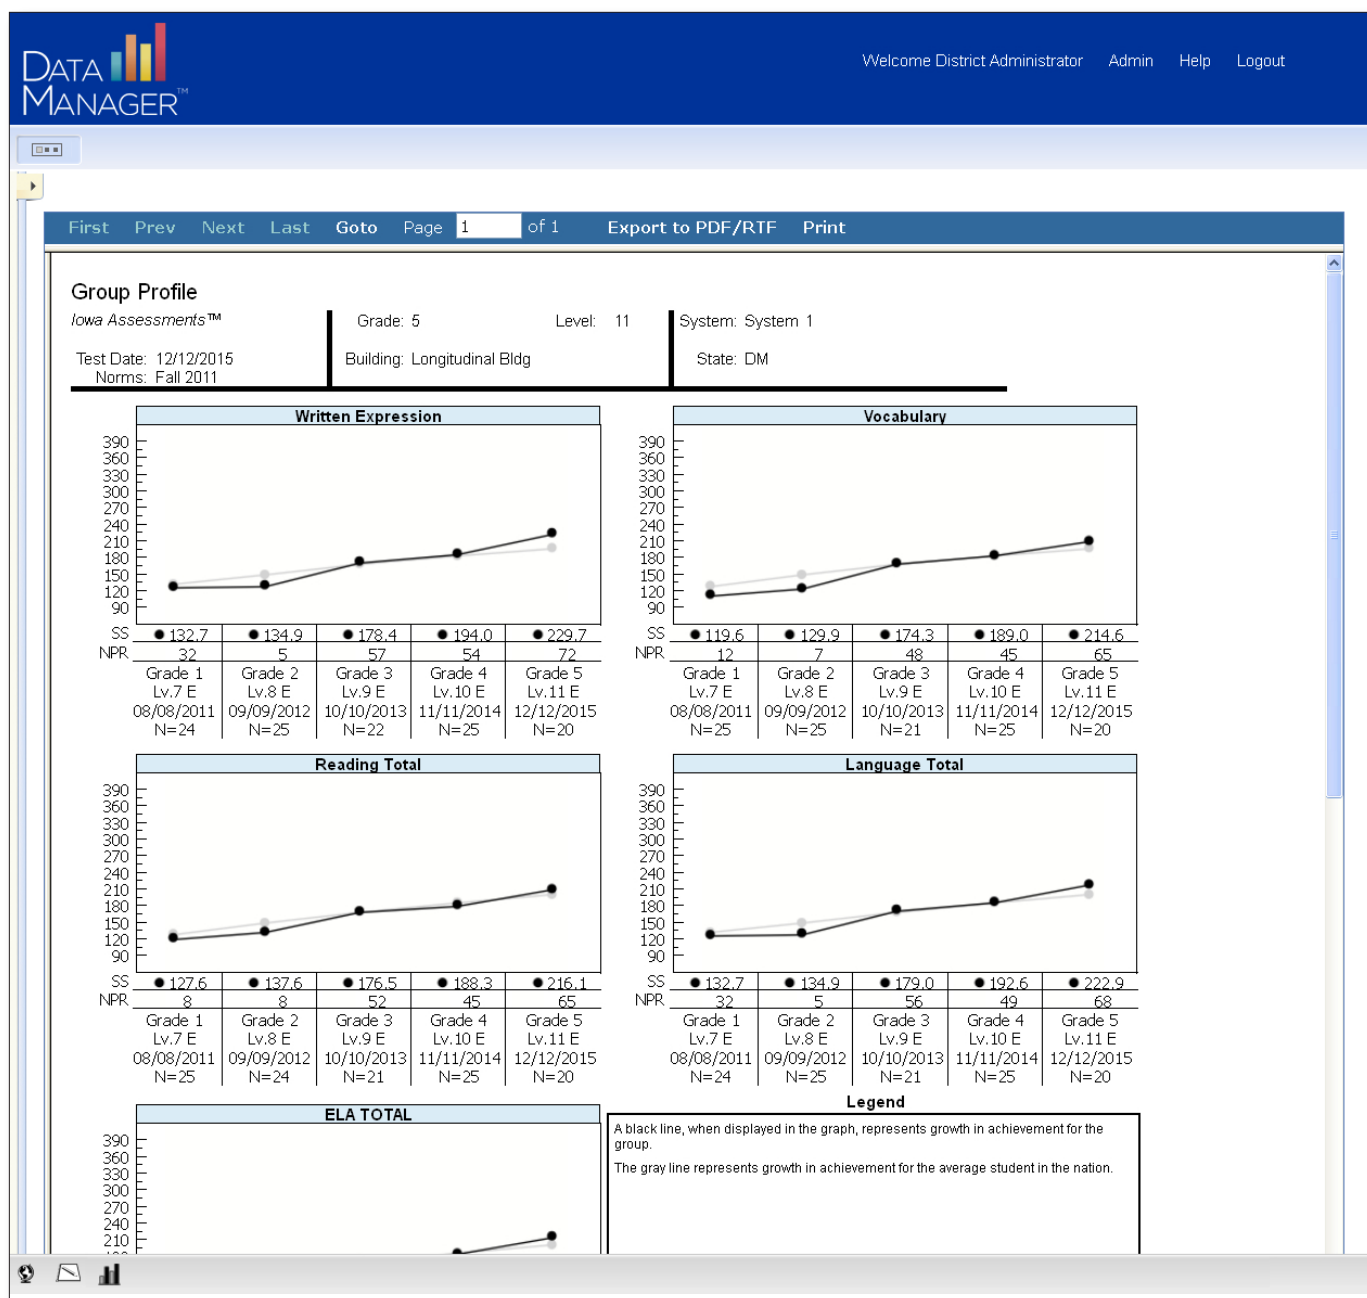

The Estimated Growth Summary Report is a powerful tool for administrators in review and evaluation of teaching effectiveness. This highly visual report can also be used by teachers for a quick “at a glance” understanding of a group’s achievement based upon two administrations of the *Iowa Assessments*. The Estimated Growth Summary Report includes the number and percent of students in the group that meet, exceed or do not meet their estimated growth.

View the college readiness of your students at a glance based on an Iowa Assessments administration. The Group Profile – College Readiness Summary Report aligns with the four content areas of the ACT®.

Use it to:

- Report the number and percent of students on track to enroll and succeed in postsecondary course work after high school graduation.

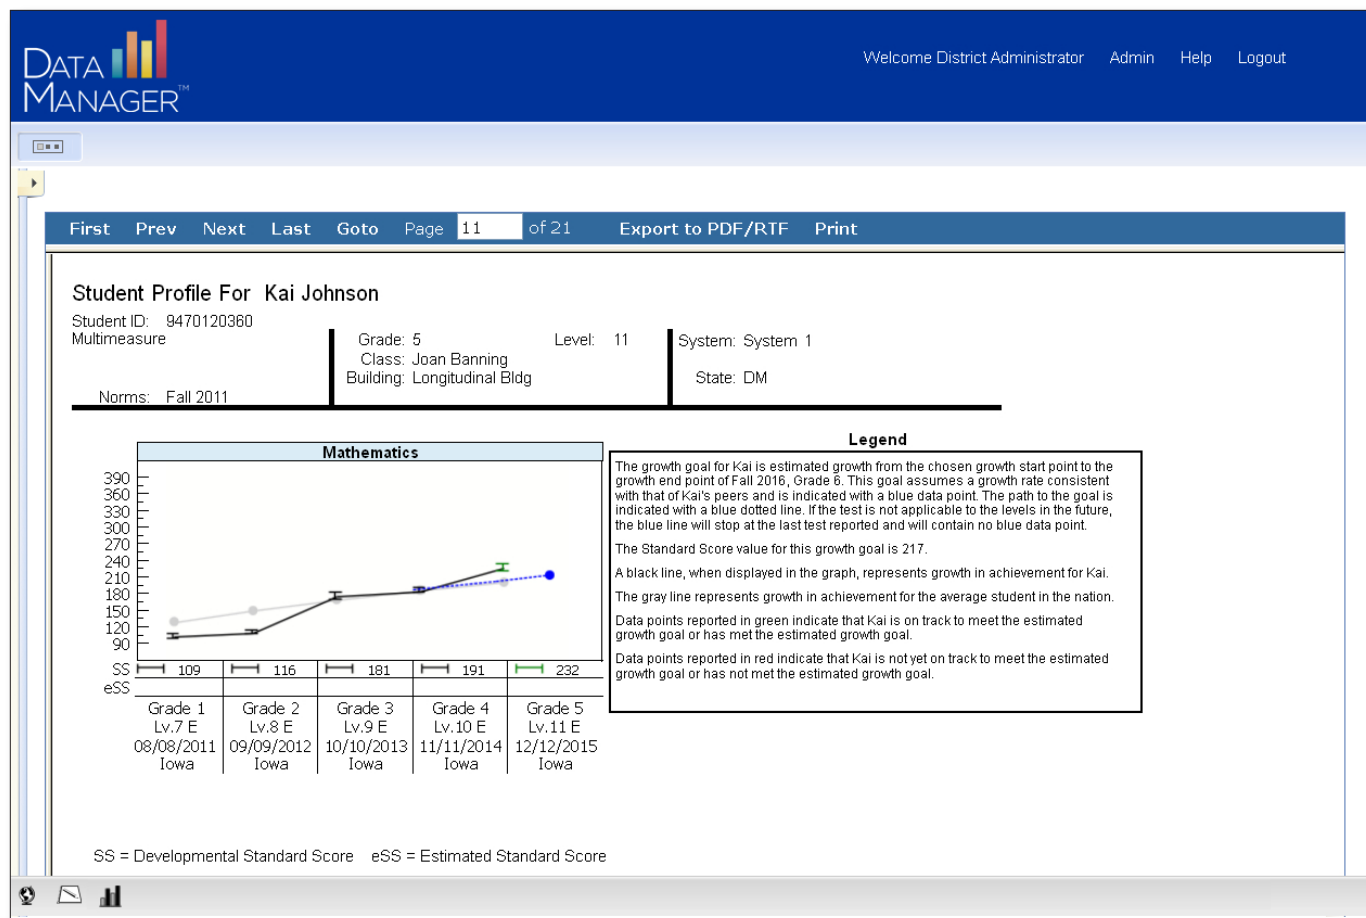

The Group Longitudinal Report displays the growth over time of specific grade groups of students or consecutive grade groups across Iowa Assessments tests.

- Scores that are available for plotting along the longitudinal line graph include the average SS, NCE, or GE for the group.
- Administrations of the Iowa Assessments are connected with the solid black line. The gray line in the background represents growth for the average student in the nation.

Use it to:

- Monitor academic progress over time.
- Compare achievement for a particular group with that of the average student in the nation.

The Student Longitudinal Estimated Growth Report tracks the actual progress of a student over the course of his elementary school career, against an estimated growth goal.

- The growth goal estimation assumes the student will grow at the same rate as that of other students his age in the national normative sample.
- Data points in green or red indicate if the student is on track or not yet on track to meet the growth goal."

Use it to:

- Track academic growth over time.
- Compare growth for a particular student with that of the average student in the nation.

An all-new report called the Multimeasure Student Roster is now available in DataManager. It allows you to compare student scores from Iowa Assessments Forms E and F, CogAT 7, and the Riverside Interim Assessments easily in one tabular display.

Use it to:

- Create one report of tests or domains, column by column
- Apply performance band indicators to the report, with values of your choice, that color code the results to easily see the subject areas needing the most immediate attention

Column 1: Age Percentile Rank (green) from 90 to 99
Column 2: National Percentile Rank (blue) from 80 to 89
Column 3: Age Percentile Rank (green) from 90 to 99, Age Percentile Rank (blue) from 80 to 89

The Multimeasure Report for CogAT shows the CogAT Verbal Score, Iowa Reading Score, CogAT QN Composite, and Iowa Math score all in a single roster-type report. This report was created as a result of requests from educators like you!

- Prescribed by Dr. Lohman, CogAT author and nationally recognized expert, this report can include multiple data points, including CogAT Verbal Score and CogAT QN Composite or CogAT Verbal Score, Iowa Reading Score, CogAT QN Composite, and Iowa Math, and other data points from CogAT, Iowa, and the Riverside Interim Assessments.
- NPR and APR are used in this sample report; however it can also be generated using an SAS, SS, and other scores.

The Balanced Assessment System (BAS) Estimated Growth Summary Report

provides a quick visual of a group's achievement based on an *Iowa Assessments* administration and *Riverside Interim Assessments* administration. This allows educators to review a summary of students who have met, exceeded or have not met estimated growth in the Common Core areas of Math and ELA.

Use it to:

- Gauge curriculum effectiveness towards the Common Core.

The Student Roster provides the scores of all students in a given class.

Use it to:

- Monitor growth
- Inform instruction
- Gauge curriculum effectiveness to the Common Core
- Support accountability

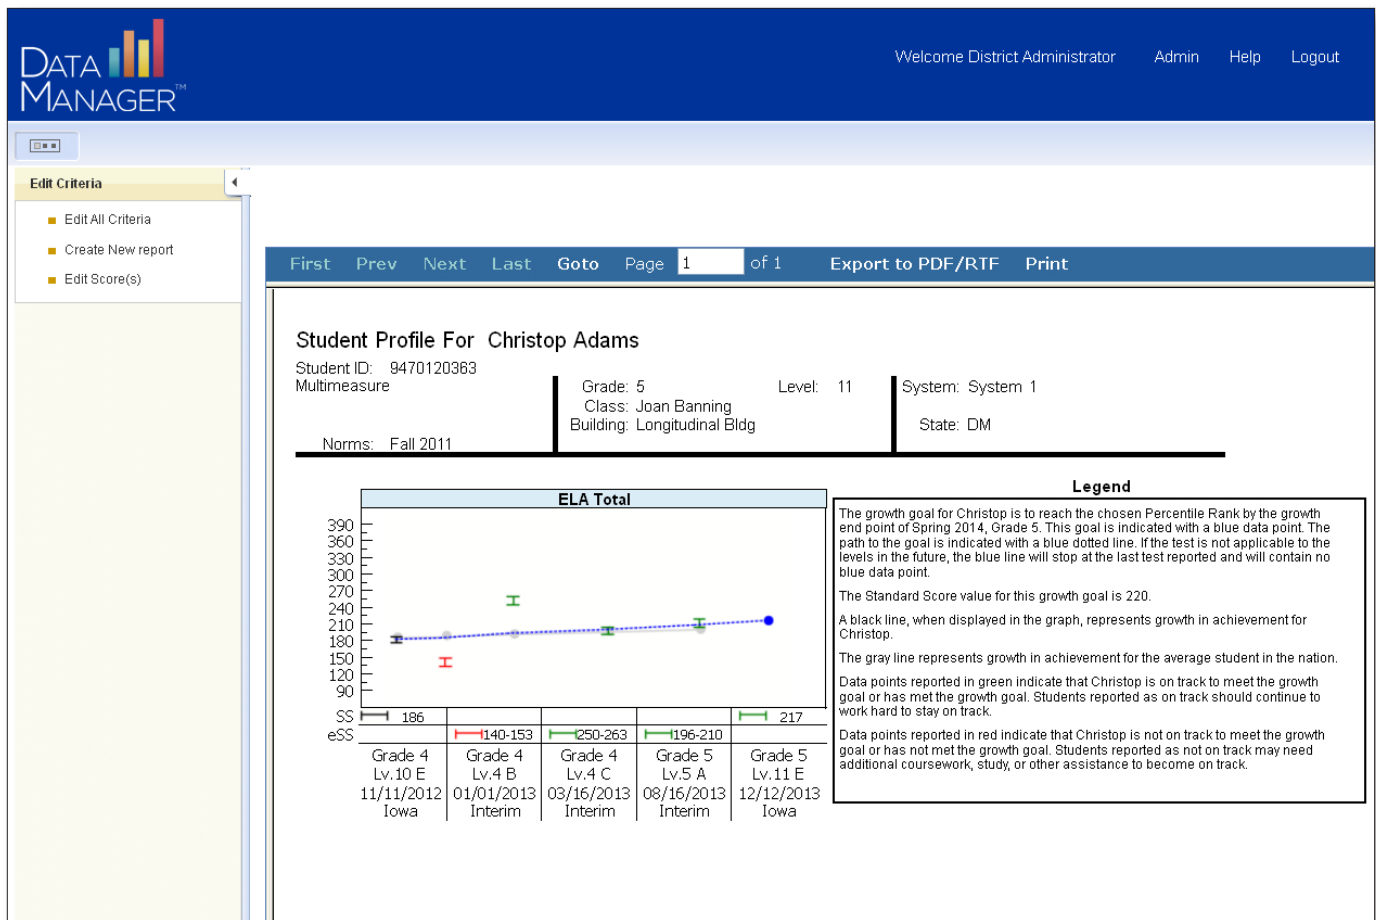

The Group Profile Progress Monitoring Report for the Riverside Interim Assessments (RIAs) uses the 'ISS-T' score (total test scale score).

Scale scores are provided on a vertical growth scale for either tests or skills assessed (Forms A, B and C) and support longitudinal monitoring of student performance. This report allows you to look at and compare the progress of groups of students over time in the English Language Arts or Mathematics Common Core content areas.

Use it to:

- Compare total test scale scores across the three forms of the *Riverside Interim Assessments*, within a grade and content area, or across grades.

The BAS Student Longitudinal Growth Goal Report allows an educator to gauge the progress of a student along a growth goal path (represented by the blue dotted line). This growth goal indicates a path to a Percentile Rank that the administrator selects when they run the report. In this particular sample, the blue dotted line represents the path to the 60th PR (which is equivalent to the student having a Standard Score of 217 at the 'growth goal end point' in Spring 2014).

Use it to:

- Get a visual indication of whether the student is on track using the administrations of the *Riverside Interim Assessments (RIA)* as monitoring points.
- Monitor results relative to the student's growth goal by the placement and color of the data points.
