DATA MINING

USES YOUR DATABASE TO UNCOVER PATTERNS AND RELATIONSHIPS AND INFERS RULES TO PREDICT FUTURE RESULTS. ESSENTIALLY, TRANSFORMING DATA INTO ACTIONABLE INFORMATION.

Centers for Medicare & Medicaid Services

|||| **UPDATE** ||||

CMS encourages you to use the new ["Basic Data Mining and Analysis for Program Integrity: A Primer for Physicians and Other Healthcare Professionals"](#) (Basic Data Mining) Toolkit located on the Medicaid Program Integrity Education ([MPIE](#)) website in the following ways.

Put the link on your webpage

- Promote the materials in your organizations' newsletters
- Announce the MPIE and its associated materials on social media websites using #MedicaidIntegrity
- Share materials with your colleagues and stakeholders.

Did You Know?

CMS frequently adds and updates toolkits on the MPIE?
