The Arkansas Trauma Rehabilitation Program (ATRP) is administered by the Arkansas Spinal Cord Commission (ASCC). Its purpose is to oversee and manage a comprehensive program to capture traumatic brain injury data for inclusion in the TBI Central Registry for the state of Arkansas. The ASCC assumed TBI registry responsibilities from the Brain Injury Alliance of Arkansas.

ATRP TBI Central Registry

Arkansas Statute §20-14-703 requires that all hospitals, attending physicians, public, private, or social agencies refer every Arkansas resident who has sustained a newly identified moderate-to-severe traumatic brain injury to the ATRP TBI Central Registry. Referrals are required within five (5) days of diagnosing/identifying the injury as a TBI.

TBI REGISTRY REFERRAL PROCESS:

- Complete the TBI Registry Referral form.
- Return it by email or fax within five (5) days of diagnosis / identification.
  
  **NOTE:** If you are not a healthcare professional, please contact the hospital social worker or ATBP health educator for assistance.

- All referrals must meet specific medical criteria. A referral of “Medically Unstable” will be considered to have met the reporting requirements.

Once Referral Form is received, ATRP will review for eligibility medical requirements, and complete information. However, it is the responsibility of reporting persons to provide all missing information as soon as possible.
